Tabular data (optimized)

- One line per record.
- Each column contains a non-repeating data type.
- No empty cells, rows, or columns.
- Column labels are located in the first row
- Transform the cell ranges into an 'array' object.
- Verify that the data formats match the data in the columns.

Power query permet d'optimiser les tableaux de données tabulaires.

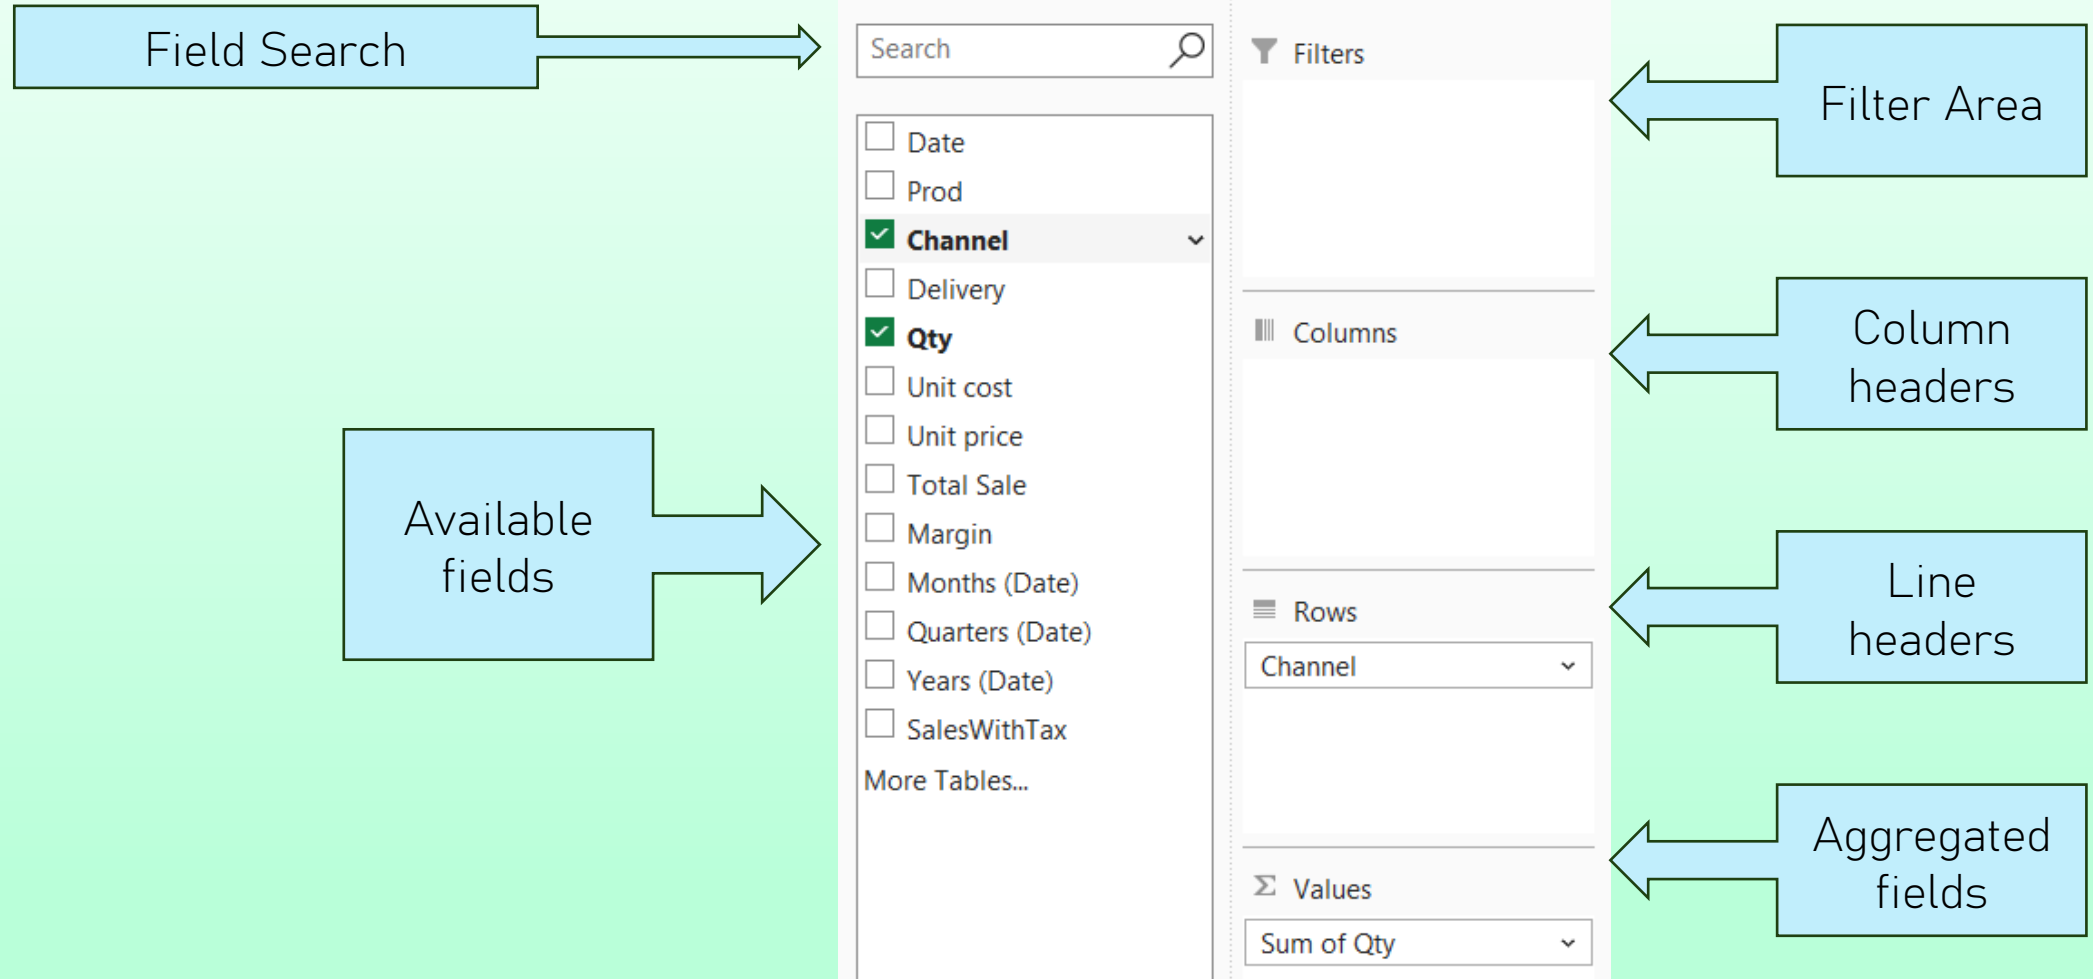

Insert a pivot table

- Once the data is ready, a pivot table can be inserted and the data analysis can begin.

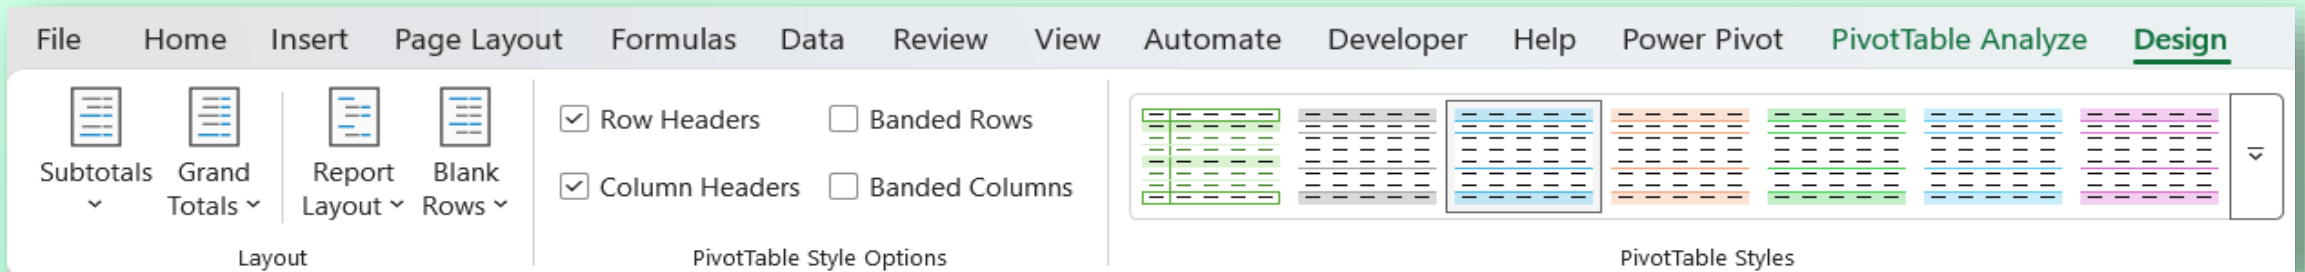

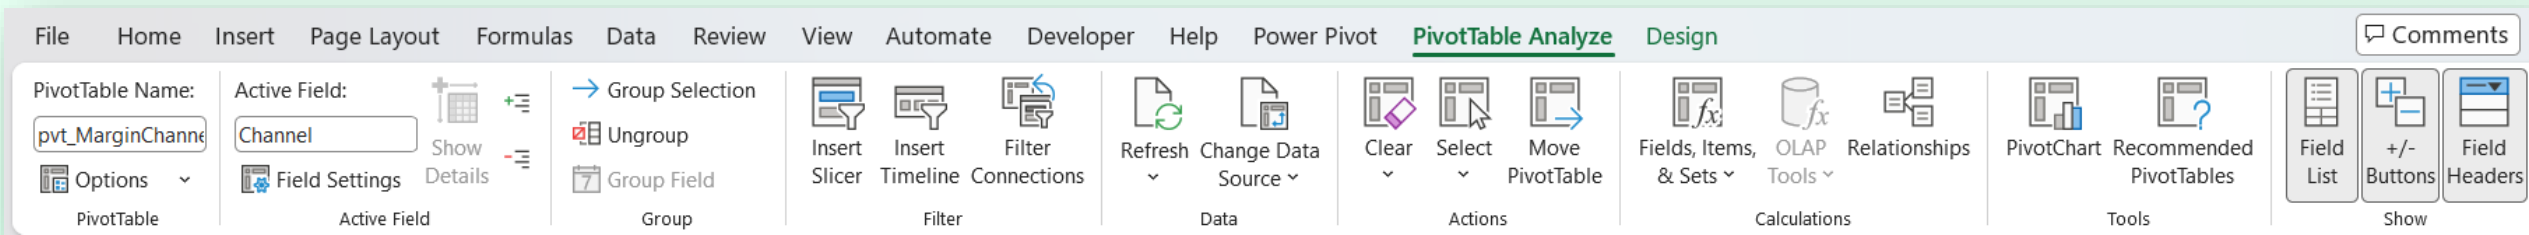

Set up a pivot table

- Once the pivot table has been created, you have to define its configuration.

Menus associated with pivot table

- When a cell in a table pivot is selected, two context menus appear in the Excel menu bar.

Pivot tables

EXERCISES

1. Create a pivot table from a data range

SOURCE: PIVOT TABLE_PRODUITS_DEPART.XLSX

- Select the data in the Data Source sheet and turn it into a table.
- Rename this board tbl_Sales.
- Insert two new columns, the 1st calculating the total sales, the 2nd calculating the margin for each row.

	A	B	C	D	E	F	G	H	I

2.1 Creating Basic Pivot Tables

- From tbl_Sales, Insert a pivot table by clicking on Insert > Recommended Pivot tables and select 'Sum of Qty by Channel' from the list. Rename to pvt_MarginChannel.
- Duplicate the pivot table and drag the [Date] field inside the columns pane of the pivot table and keep only the Years from the automatic hierarchy created. Change the aggregation to average (right-click on the > Value Field Settings field > Average). Rename pvt_MarginYear.
- Duplicate the pivot table again and swap [Channel] for [Delivery] in the rows. Add [Qty], [Total Sale] and [Margin] to the values. Add [date] to the values, the aggregation should be 'Count'. Rename that column NB Sales. Rename the pivot table pvt_DeliveryYear.

Row Labels	Sum of Qty			
Internet	586			
Phone	458			
Salesperson	438			
Store	520			
Grand Total	2002			
AVG Sale	Cols			
Rows	2021	2022	Grand Total	
Internet	5 783 CHF	6 029 CHF	5 911 CHF	
Phone	4 136 CHF	6 596 CHF	5 301 CHF	
Salesperson	4 781 CHF	7 253 CHF	6 129 CHF	
Store	4 454 CHF	6 502 CHF	5 433 CHF	
Grand Total	4 797 CHF	6 549 CHF	5 678 CHF	
Row Labels	Units sold	Total Sales	Total Margin	Count of Date
Air mail	389	187 624 CHF	53 473 CHF	32
Express mail	361	159 859 CHF	45 591 CHF	33
Pickup	605	257 444 CHF	73 425 CHF	49
Regular mail	291	159 565 CHF	45 486 CHF	22
Reseller	356	161 061 CHF	45 923 CHF	27
Grand Total	2002	925 553 CHF	263 898 CHF	163

2.2 Insert calculated fields and/or elements

Duplicate an existing pivot table and view total sales by channel.

Click PivotTable Analyze > Fields, Items, and Sets > Calculated Field and create a field that calculates the amount of sales including Taxes (in a new column) as shown on the right:

A calculated field adds a column in the pivot table.

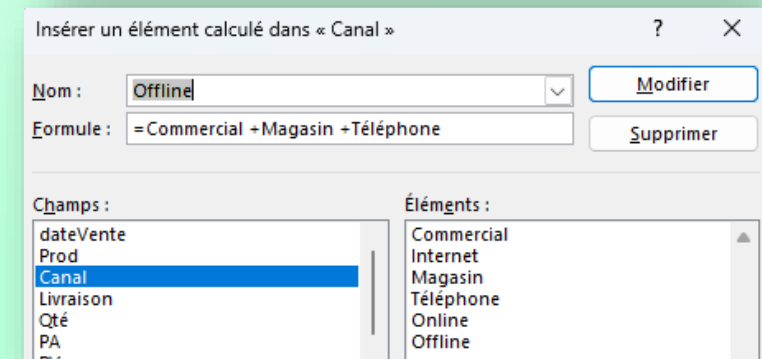

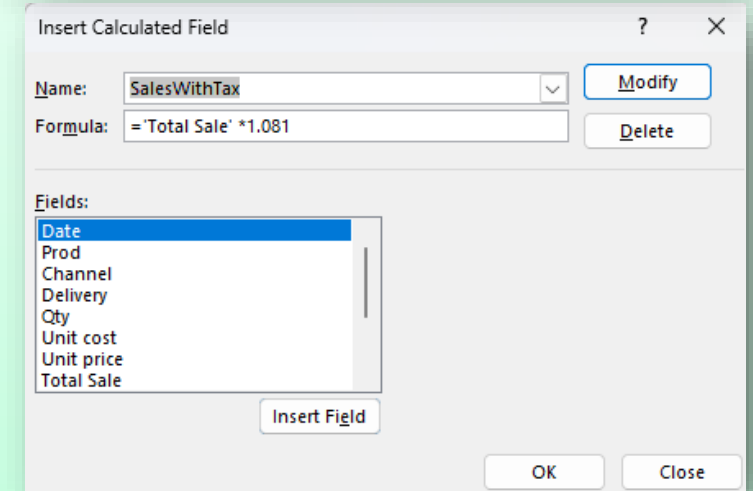

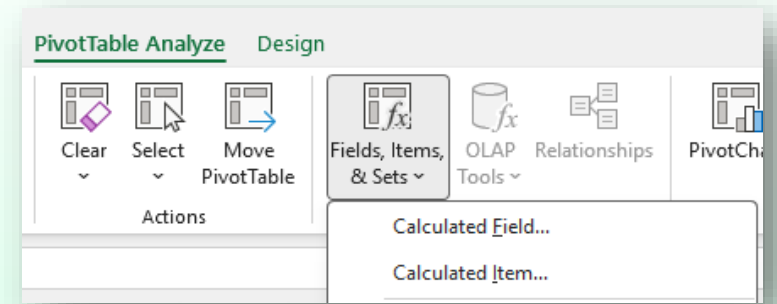

Create a calculated element named 'offline' that sums up the non-Internet channels (in a new line). Create another calculated element that takes the value of the 'Internet' channel.

Select the Row labels column before selecting the calculated element in the menu.

A calculated item adds a row in the pivot table.

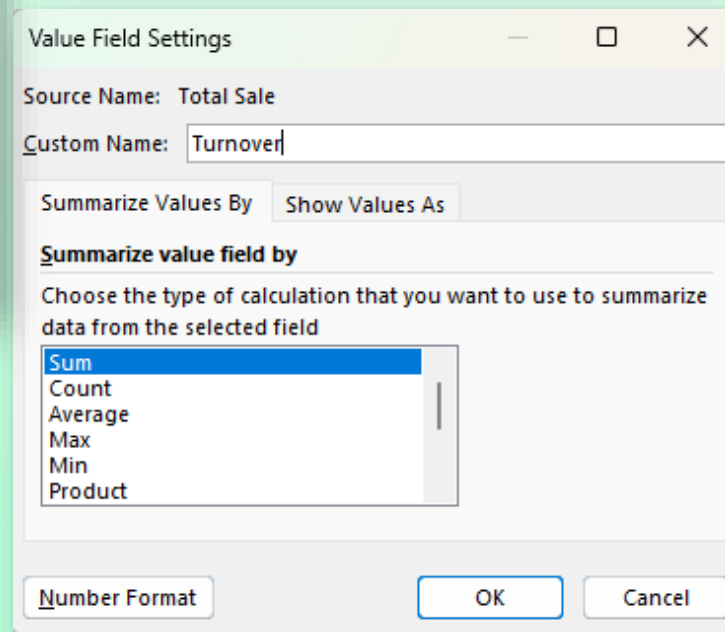

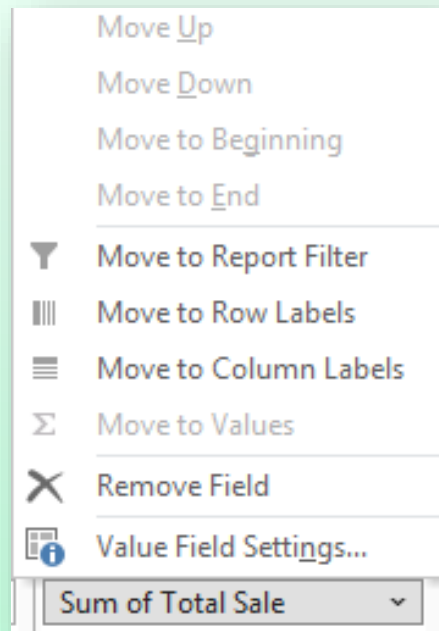

WARNING: calculated elements are not applicable if data is linked to power pivot or if you have used a date field or any other type of grouped field in the same pivot cache,

(solution: copy the source data and create a new pivot table (+cache) from the copied data).

2.3 Changing Column Names

- Edit the texts in the headers: in the 'Values' area, click on the field name and then on 'Value field settings'. In the window that opens, change 'Custom Name' to change the header text.

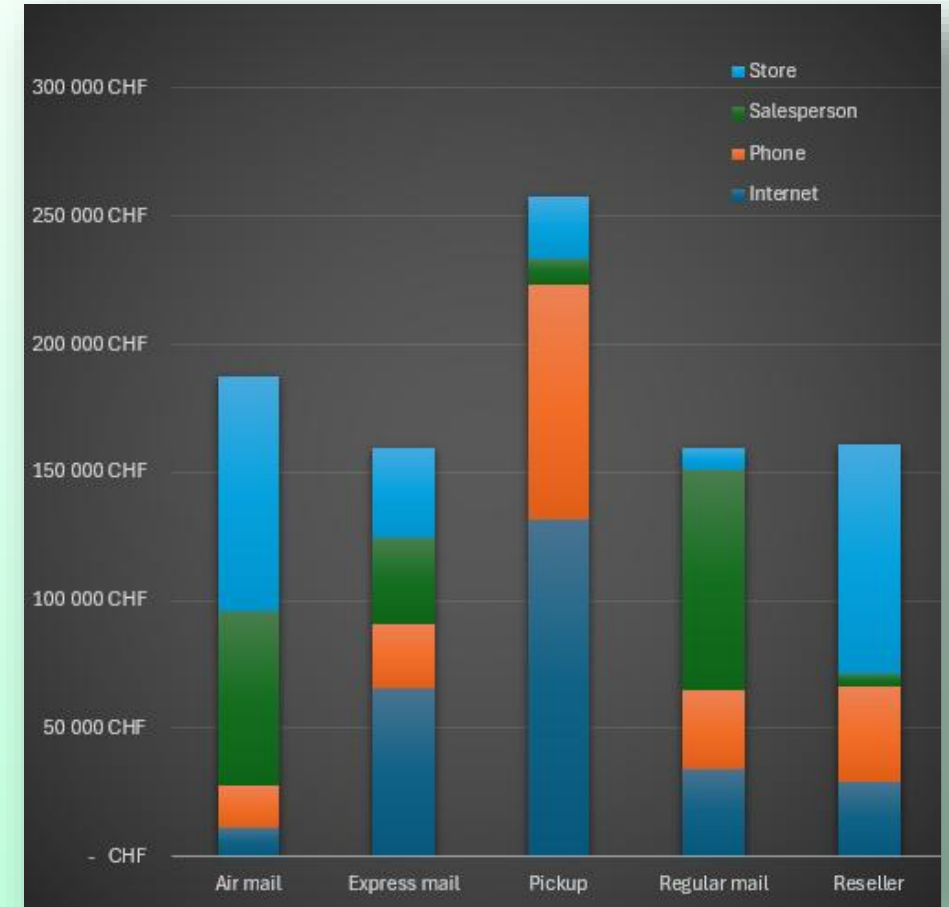

Row Labels	Turnover
Internet	271 923 CHF
Phone	201 438 CHF
Salesperson	202 258 CHF
Store	249 934 CHF
Offline	653 630 CHF
Online	271 923 CHF
Grand Total	1 851 106 CHF

3. Inserting a pivot chart

- Create a new pivot table on a new sheet and drag [Channel] in the columns, [Delivery] in the rows and [Total Sale] in the values. Rename pvt_DeliveryChannel.
- Insert a stacked column chart from the 'PivotTable Analyze' menu.
- WARNING: Not all charts are available as a pivot chart.

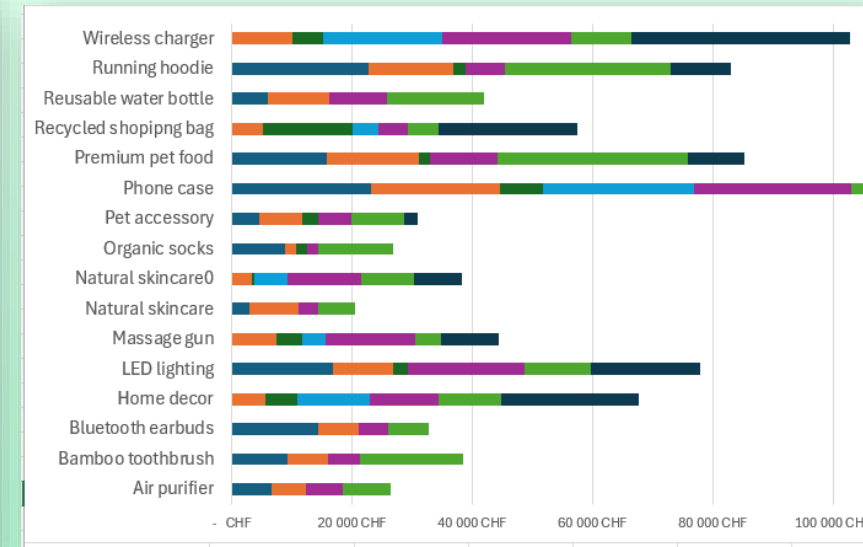

Sum of Total Sale					
Column Labels					
Row Labels	Internet	Phone	Salesperson	Store	Grand Total
Air mail	11 277 CHF	16 713 CHF	67 897 CHF	91 737 CHF	187 624 CHF
Express mail	65 529 CHF	24 962 CHF	34 006 CHF	35 362 CHF	159 859 CHF
Pickup	131 519 CHF	91 725 CHF	9 950 CHF	24 250 CHF	257 444 CHF
Regular mail	34 194 CHF	30 841 CHF	85 946 CHF	8 584 CHF	159 565 CHF
Reseller	29 404 CHF	37 197 CHF	4 459 CHF	90 001 CHF	161 061 CHF
Grand Total	271 923 CHF	201 438 CHF	202 258 CHF	249 934 CHF	925 553 CHF

4. Pivot table Sales by year/quarter.

- From the source table tbl_Sales, click on Table Design > Summarize with Pivot Table and in the popup window, choose 'in a new sheet'. Drag the [Margin] column into the values, [Prod] into the rows, and [saledate] into the columns. Keep only the quarter and the year. Rename both the pivot table and the sheet pvt_ProdYear.
- Insert a stacked bars pivot chart. Try sorting the rows in the pivot table manually (you can select blocks of row labels and move them around to reorder the rows in the pivot table).

Sum of Total Sale		Column Labels									
		2021				2022

5.1 Sales History

- Duplicate an existing pivot table (or a whole sheet) and drag [Total Sale] into the values, then [Years] and [Months] into the rows.
- Add [Total Sale] 3 times in the pivot table values window. For the last 2 occurrences, change the settings of the value fields and display the total as % of the parent row total and then as % of the grand total. Rename these two columns to '% of year' and '% of total' e.g.

5.1 Sales History

- Create a cond. Formatting rule with bars only in the 2nd column of values.
- Go to Design > Subtotals > Show Subtotals at the bottom of the group.
- Rename the pivot table pvt_SalesMulti.
- Double-click on any calculated value to view the list of rows that generated that value.

Year	Month	Total Sale		% of CY	% of global
2021	janv	18 201 CHF		4.68%	1.97%
	févr	45 782 CHF		11.78%	4.95%
	mars	67 131 CHF		17.28%	7.25%
	avr	28 631 CHF		7.37%	3.09%
	mai	42 383 CHF		10.91%	4.58%

Grand Total		925 553 CHF	925 553 CHF	100.00%	100.00%

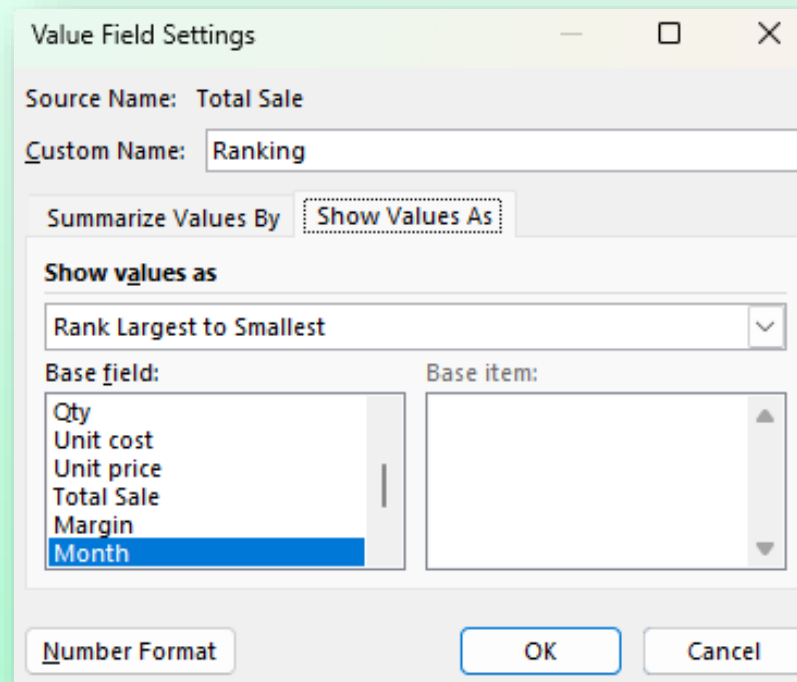

5.2 Sales History

- Insert a line pivot chart.
- Insert a 'Forecast' trendline on the graph along with the 2-period moving average. Format the colors of these 2 trend lines and smooth out the sales series.
- Insert a timeline based on the date and select time intervals in the timeline to view the trend over 1 year or several quarters.

6. View the rank of [Total Sales]

- Duplicate pvt_SalesMulti in a new sheet. Keep only [Total] and [% of Total]. Drag [Total Sale] back into the values and then go to 'Value Field Settings' then click the 'Show Values As' tab and select 'Rank from Largest to Smallest' in the menu. Select 'Month' in the 'Base Field' window. Rename 'Rank'.
- Sort the pivot table by this new [Rank] column and insert a cond formatting on the top 5 values of the column [% of total].
- Rename pvt_DateRank.

Year	Month	Total Sale	% of total	Ranking
2021	janv	18 201 CHF	1.97%	9
	févr	45 782 CHF	4.95%	3
	mars	67 131 CHF	7.25%	2
	avr	28 631 CHF	3.09%	6
	mai	42 383 CHF	4.58%	4
	juin	67 581 CHF	7.30%	1
	juil	16 442 CHF	1.78%	10
	août	19 111 CHF	2.06%	8
	sept	12 664 CHF	1.37%	11
	oct	9 198 CHF	0.99%	12
	nov	40 273 CHF	4.35%	5
	déc	21 131 CHF	2.28%	7
2022	janv	40 602 CHF	4.39%	8
	févr	58 523 CHF	6.32%	7
	mars	65 712 CHF	7.10%	5
	avr	69 169 CHF	7.47%	3
	mai	67 572 CHF	7.30%	4
	juin	64 031 CHF	6.92%	6
	juil	81 432 CHF	8.80%	1
	août	71 224 CHF	7.70%	2
	sept	18 760 CHF	2.03%	9
Grand Total		925 553 CHF	100.00%	

7.1 Monthly Changes

- Insert a new table pivot into a new sheet and place [Total] in the values, [Month] in the rows, and [Years] in the filters. Filter on 2021.
- Place [Total Sale] in the values a 2nd time and change the settings for this value to show the difference with the previous month. Rename 'vs PM'.
- Apply conditional formatting in this column that highlights negative values.
- Add [Total Sale] again and configure the settings to display the difference in % with the month of january, rename [vs January]. Add another cond. Formatting to highlight negative values.

Year	2021		
Month	Total Sale	vs PM	vs January
janv	18 201 CHF		
févr	45 782 CHF	27581	152%
mars	67 131 CHF	21349	269%
avr	28 631 CHF	-38500	57%
mai	42 383 CHF	13752	133%
juin	67 581 CHF	25198	271%
juil	16 442 CHF	-51139	-10%
août	19 111 CHF	2669	5%
sept	12 664 CHF	-6447	-30%
oct	9 198 CHF	-3466	-49%
nov	40 273 CHF	31075	121%
déc	21 131 CHF	-19142	16%
Grand Total	388 528 CHF		

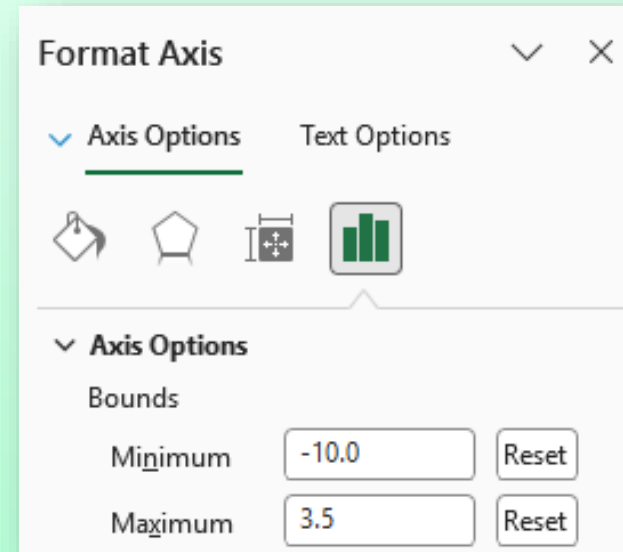

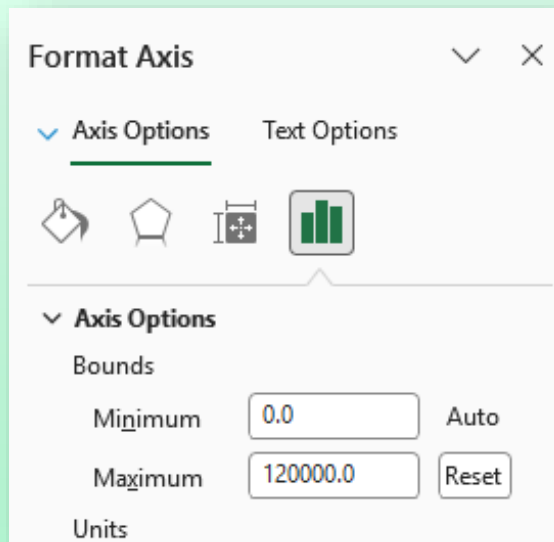

7.2 Monthly changes

- Duplicate pvt_DateRank on a new sheet and keep only the months in the rows and total sales in the values. Add Total Sales again in the values and display as %diff from previous month.
- Rename pvt_MonthVariation.
- Insert a combo pivot chart and select 2 columns chart with the secondary axis enabled for the % series. For both series, enable data labels on the outer edge of columns (Label Format > Label Options> Position > Outer Edge).

Year	2021	
Month	Total Sale	% diff PM
janv	18 201 CHF	
févr	45 782 CHF	151.54%
mars	67 131 CHF	46.63%
avr	28 631 CHF	-57.35%
mai	42 383 CHF	48.03%
juin	67 581 CHF	59.45%
juil	16 442 CHF	-75.67%
août	19 111 CHF	16.23%
sept	12 664 CHF	-33.73%
oct	9 198 CHF	-27.37%
nov	40 273 CHF	337.85%
déc	21 131 CHF	-47.53%
Grand Total	388 528 CHF	

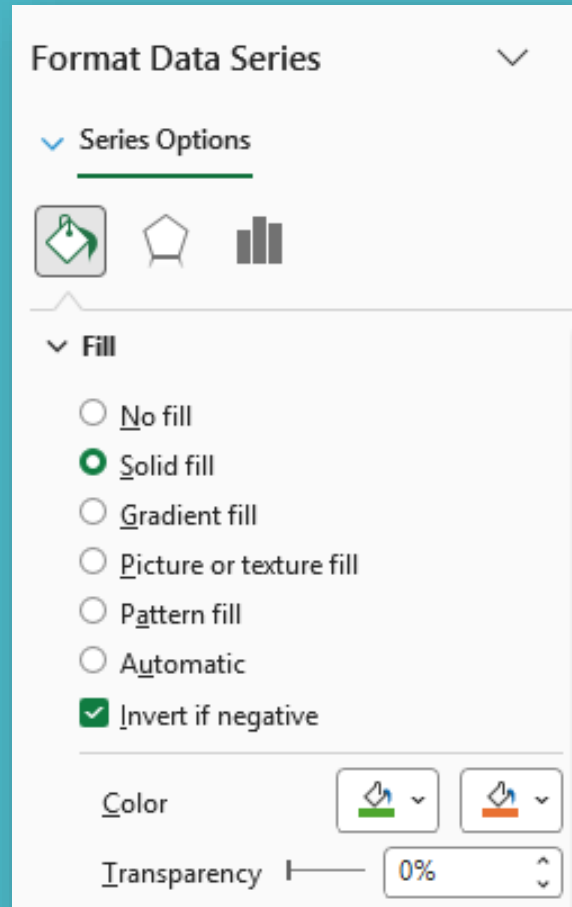

7.2 Monthly changes

- Insert a combo pivot chart and select 2 columns chart with the secondary axis enabled for the % series. For both series, enable data labels on the outer edge of columns (Label Format > Label Options> Position > Outer Edge).
- Increase the maximum Y-axis value to 120K.
- Format the secondary Y-axis with a minimum value of -10 and maximum value of 3.5.

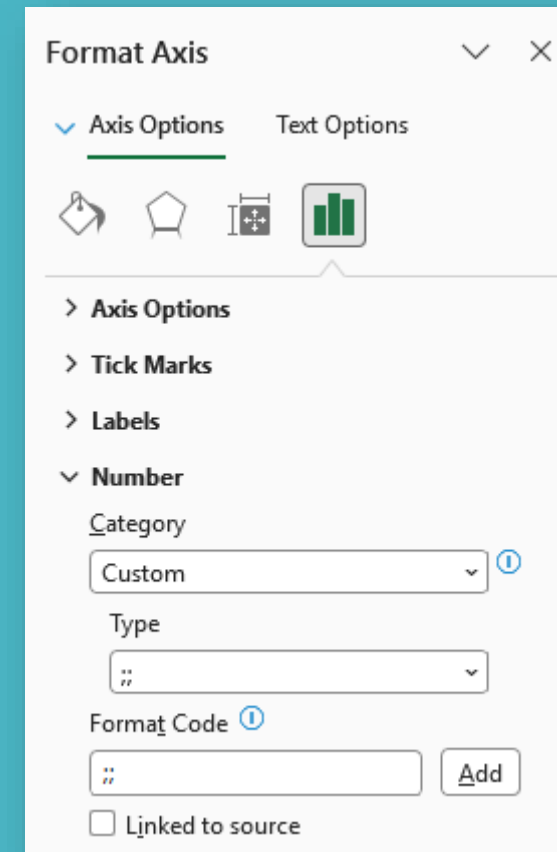

7.2 Monthly changes

Format the series [% diff PM] as follows:

To remove the labels on the secondary Y-axis:
Format axis > Number > Format Code > ;;
and press 'Add'.

7.3 Monthly Changes

8. YoY Comparison

- Create a new pivot table in a new sheet and place [Qty] in the values, [Months] in the rows and [Years] in the columns. Rename pvt_YoY.
- Drag [Qty] a 2nd time in the values then open the settings of the value fields and configure as follows:

Value Field Settings

Source Name: Qty

Custom Name: vs PY %

Summarize Values By: Show Values As

Show values as

% Difference From

Base field: Year

Base item: (previous)

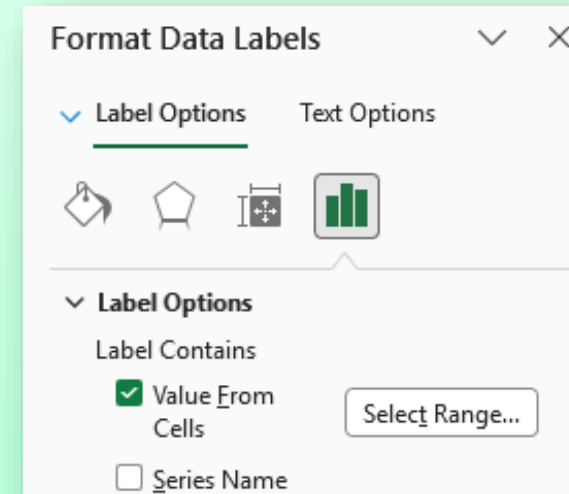

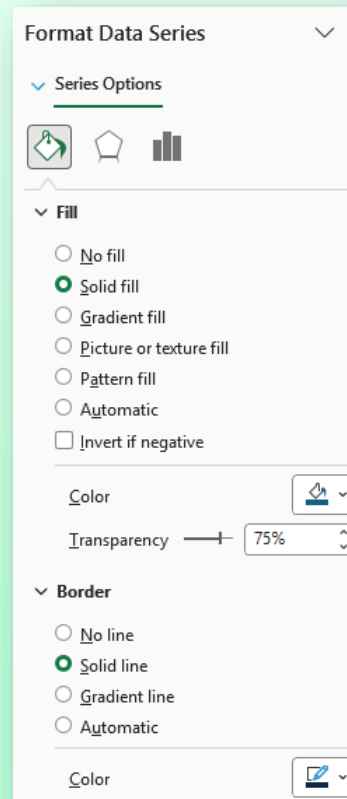

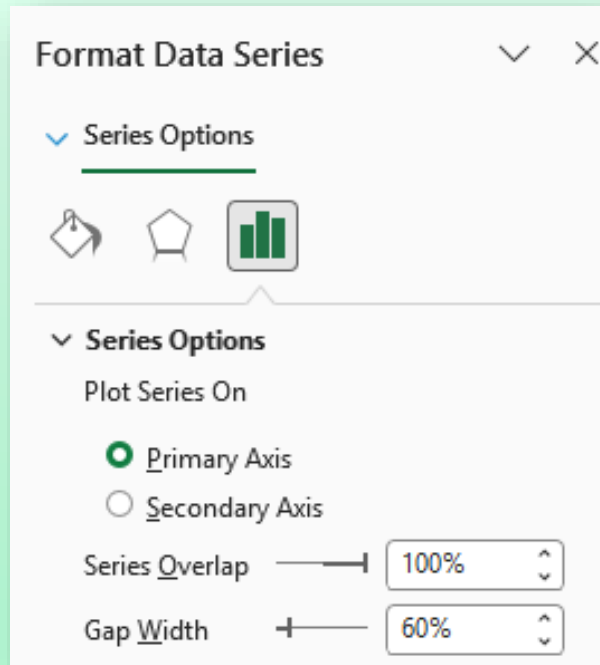

Number Format

OK Cancel

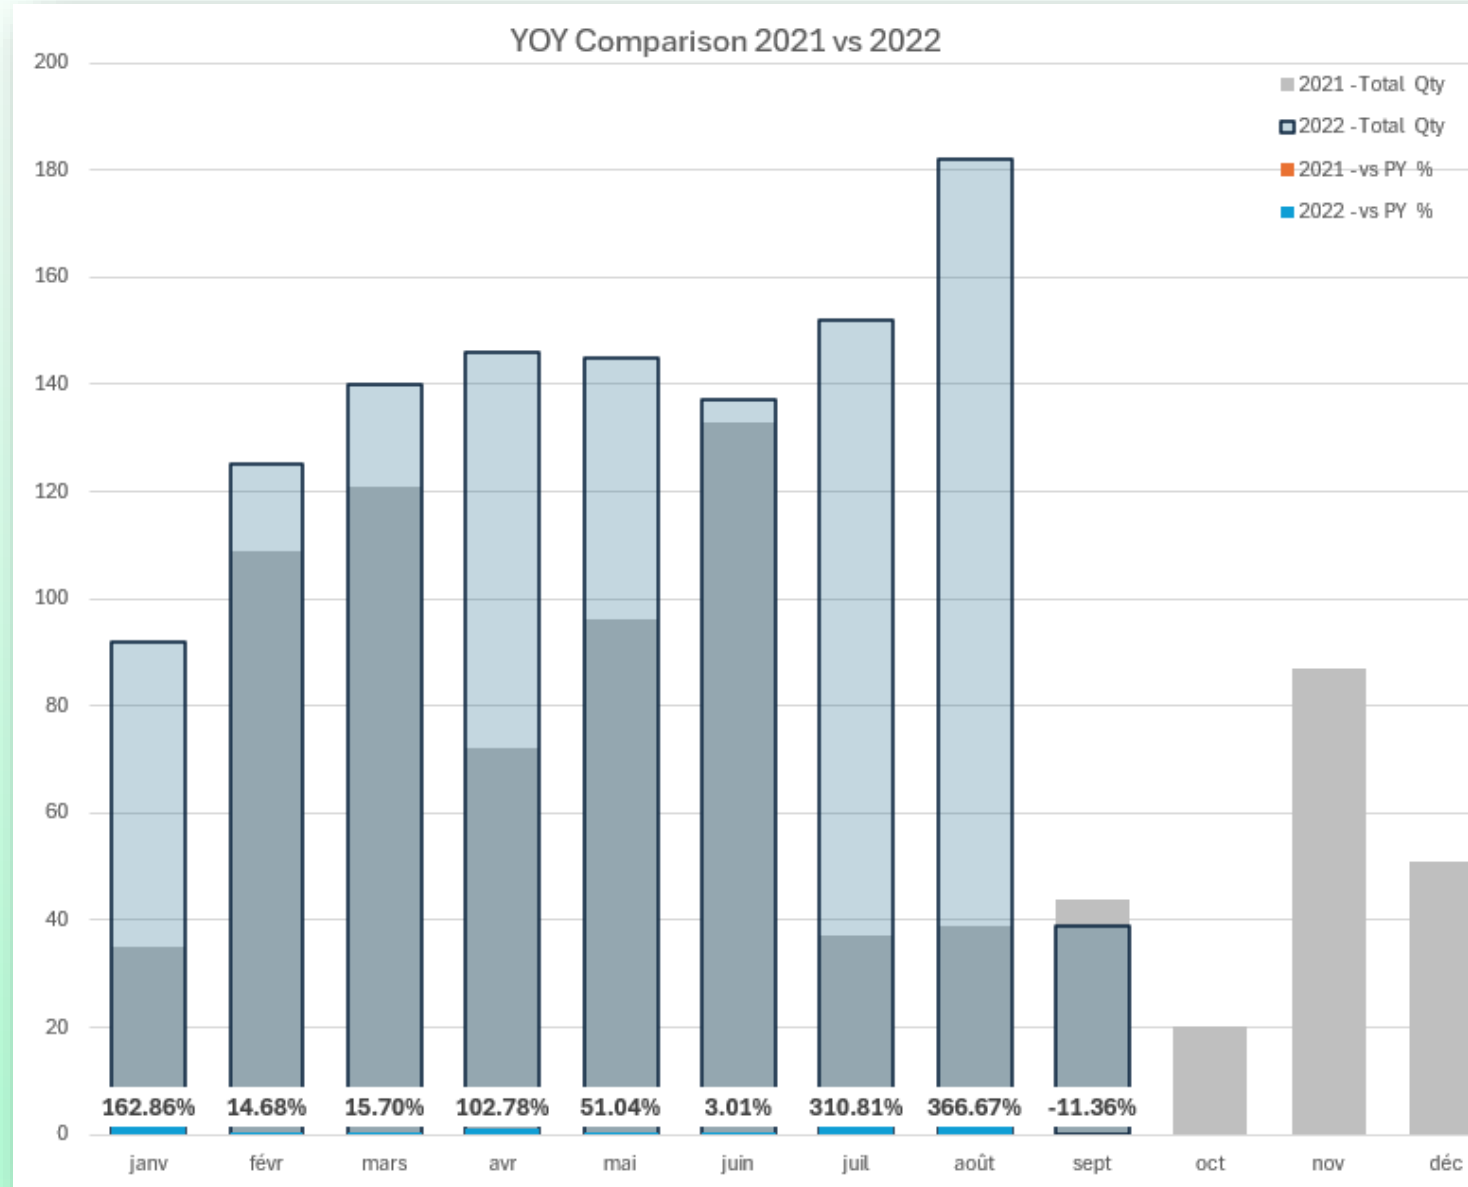

Month	Year 2021		Year 2022	
	Total Qty	vs PY %	Total Qty	vs PY %
janv	35		92	162.86%
févr	109		125	14.68%
mars	121		140	15.70%
avr	72		146	102.78%
mai	96		145	51.04%
juin	133		137	3.01%
juil	37		152	310.81%
août	39		182	366.67%
sept	44		39	-11.36%
oct	20			#NULL!
nov	87			#NULL!
déc	51			#NULL!
Grand Total	844		1158	37.20%

8. YoY combo chart

- Insert a combo chart from the pivot table then format the series overlap to 100% (Format Data series > Options > Series Overlap) and reduce Gap Width to 60%.
- Change the colors of the forefront series to 75% transparent (with a border). In order to make the [vs PY %] series invisible on the chart, change its color to 'No fill'.
- Add data labels and select the values from the range in the [vs PY %] column in the pivot table.

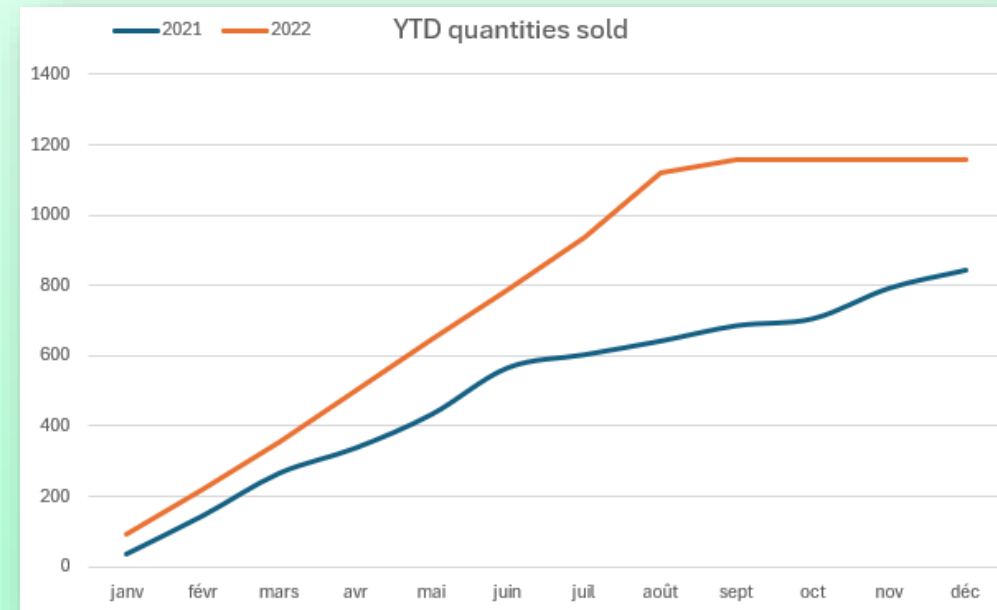

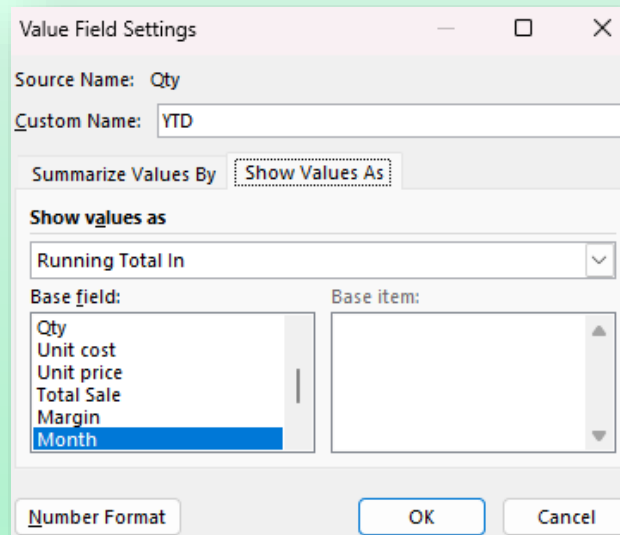

8. YoY combo chart

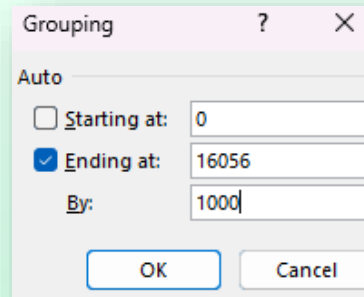

10.1 Changes in quantities and YTD values

- Duplicate pvt_QtyPY in a new sheet and keep only [Qty] in the values and drag [Years] in the columns.
- Display [Qty] as the running total for each month.
- Insert a line chart comparing the running totals year by year.

11.1 Margin by grouped rows

- Insert a new pivot table into a new sheet and place [Margin] in the values and [Total Sale] in the rows.
- Group line labels by group of 1000. Right-click on the and select 'Group' from the context menu.
- Add conditional formatting to show the top 3 margins achieved.
- Add [Margin] to the values and display as % of grand total. Repeat the cond. formatting for this column.
- Rename pvt_GroupedBySales.

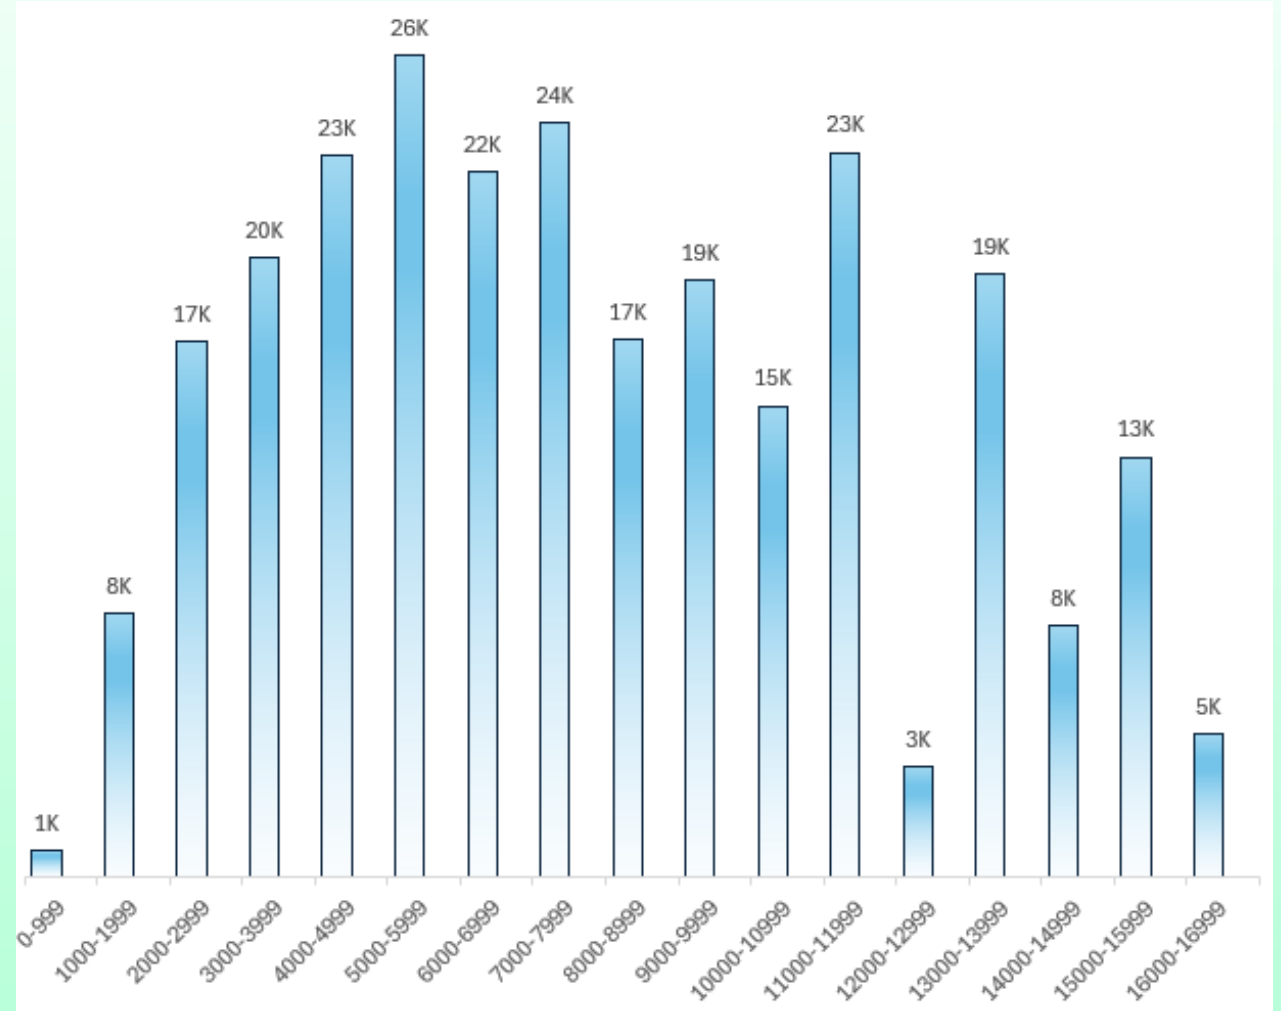

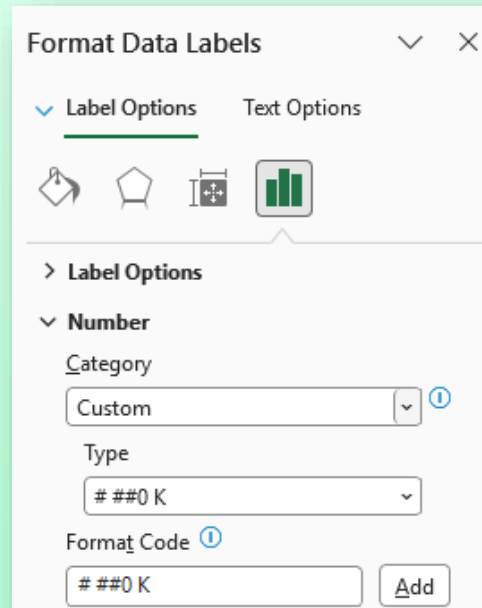

Total Sale ▼	Margin	Margin %
0-999	845 CHF	0.32%
1000-1999	8 405 CHF	3.18%
2000-2999	17 028 CHF	6.45%
3000-3999	19 656 CHF	7.45%
4000-4999	22 934 CHF	8.69%
5000-5999	26 083 CHF	9.88%
6000-6999	22 411 CHF	8.49%
7000-7999	23 919 CHF	9.06%
8000-8999	17 087 CHF	6.47%
9000-9999	18 962 CHF	7.19%
10000-10999	14 963 CHF	5.67%
11000-11999	23 005 CHF	8.72%
12000-12999	3 496 CHF	1.32%
13000-13999	19 150 CHF	7.26%
14000-14999	8 022 CHF	3.04%
15000-15999	13 348 CHF	5.06%
16000-16999	4 584 CHF	1.74%
Grand Total	263 898 CHF	100.00%

11.2 Margin by grouped rows

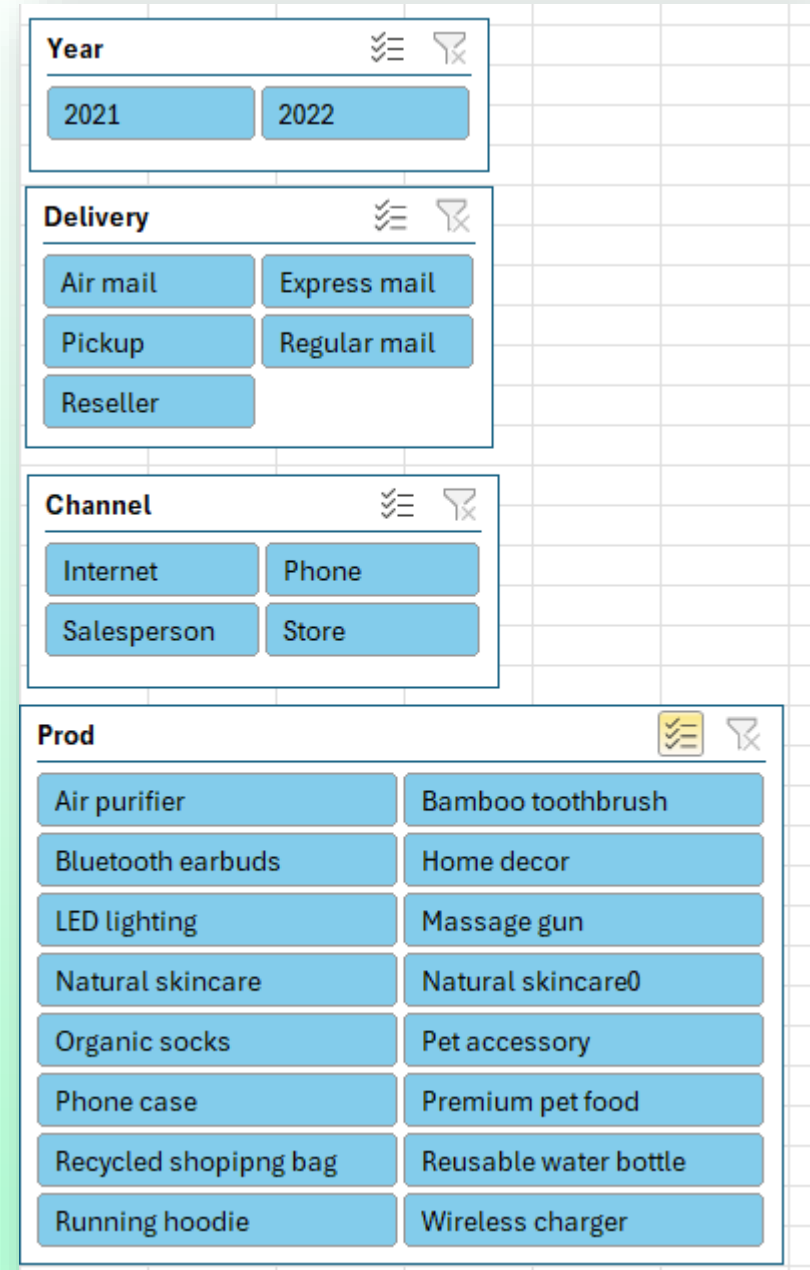

- Insert a clustered columns pivot chart.
- Activate Data labels for the [Margin] series and format the number to display in thousands.

Format > options > Number > # ##0 K

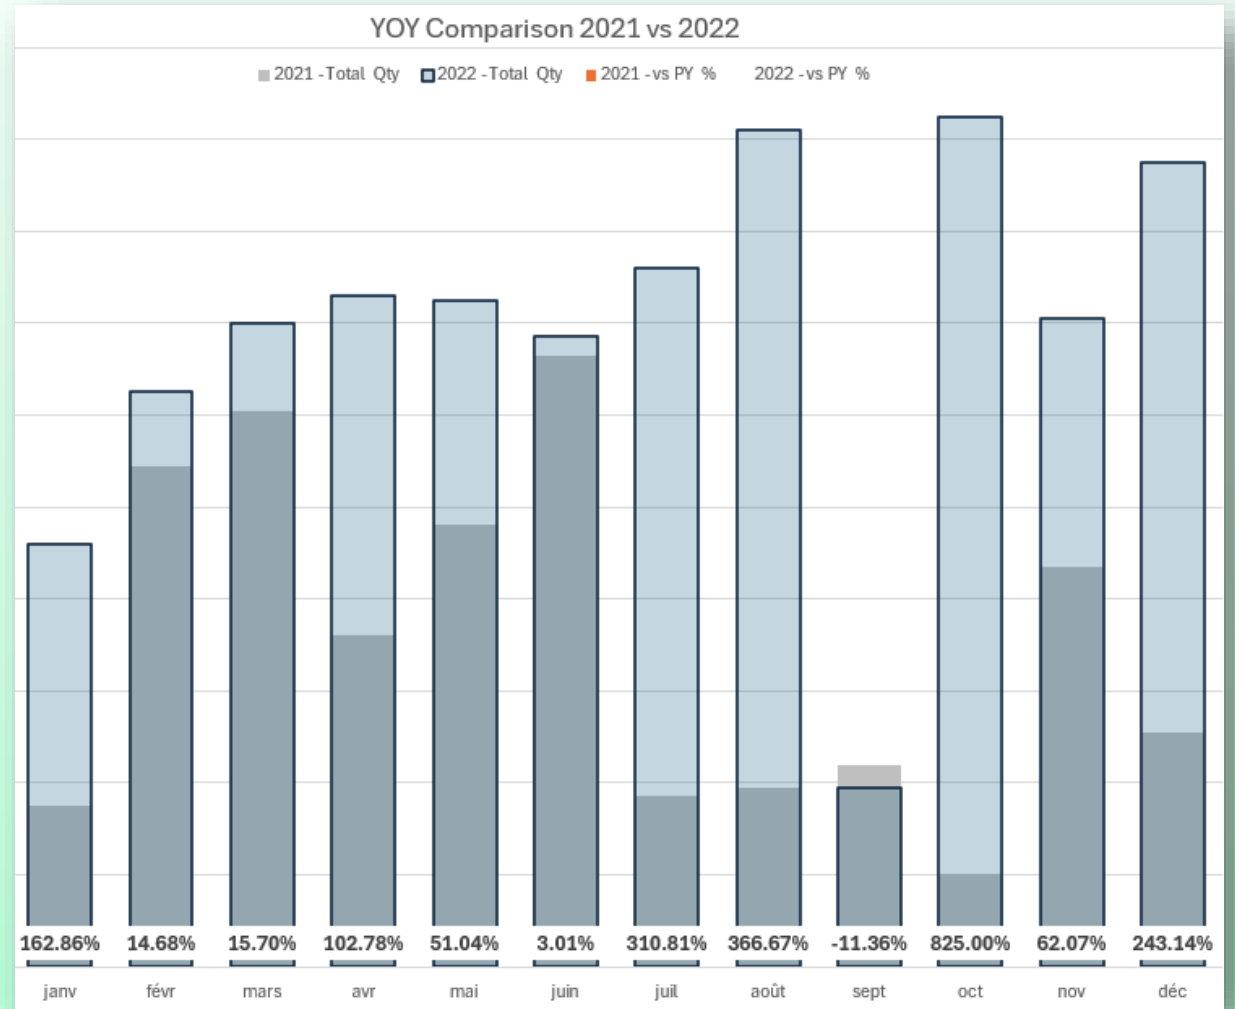

11.3 Slicers

- Insert 4 slicers from the PivotTable Analyze menu and choose [Prod], [Delivery], [Channel], and [Years].
- Format the slicers from the Slicer menu (i.e number of columns, hide no data options, color, etc)
- Check the connections between the slicers and the workbook pivot tables (Slicer > Report Connections).
- Select values in the slicers to visualize changes in the pivot table and chart.

Updating the data

- Copy / Paste the new data from the 'New data' sheet to the end of the table in 'Data Source'.
- Go to the YoY sheet and refresh the pivot table to view the update of the data.
