

The image features a large, stylized Excel logo on the left side, composed of four green rounded rectangles arranged in a 2x2 grid. The top-left rectangle is partially obscured by a vertical oval cutout showing a bar chart. The top-right rectangle is partially obscured by a vertical oval cutout showing a bar chart. The bottom-left rectangle is partially obscured by a vertical oval cutout showing a bar chart. The bottom-right rectangle is partially obscured by a vertical oval cutout showing a bar chart. The background of the entire image is a dark, blurred view of a computer screen displaying a bar chart with green bars and a line graph with orange lines. The Excel logo is a large, stylized 'X' made of four green rounded rectangles. The text 'EXCEL POWER PIVOT' is written in a bold, white, sans-serif font with a green outline, centered on the right side of the image.

EXCEL POWER PIVOT

Importing from Excel

The diagram view

The image shows the Excel ribbon and the diagram view. A blue arrow with the number '1' points to the 'Diagram View' button in the 'View' group of the ribbon. The diagram view displays five tables: CAT, CLIENTS, INVOICES, SUBCAT, and SERVICES, each with its fields listed below the table name.

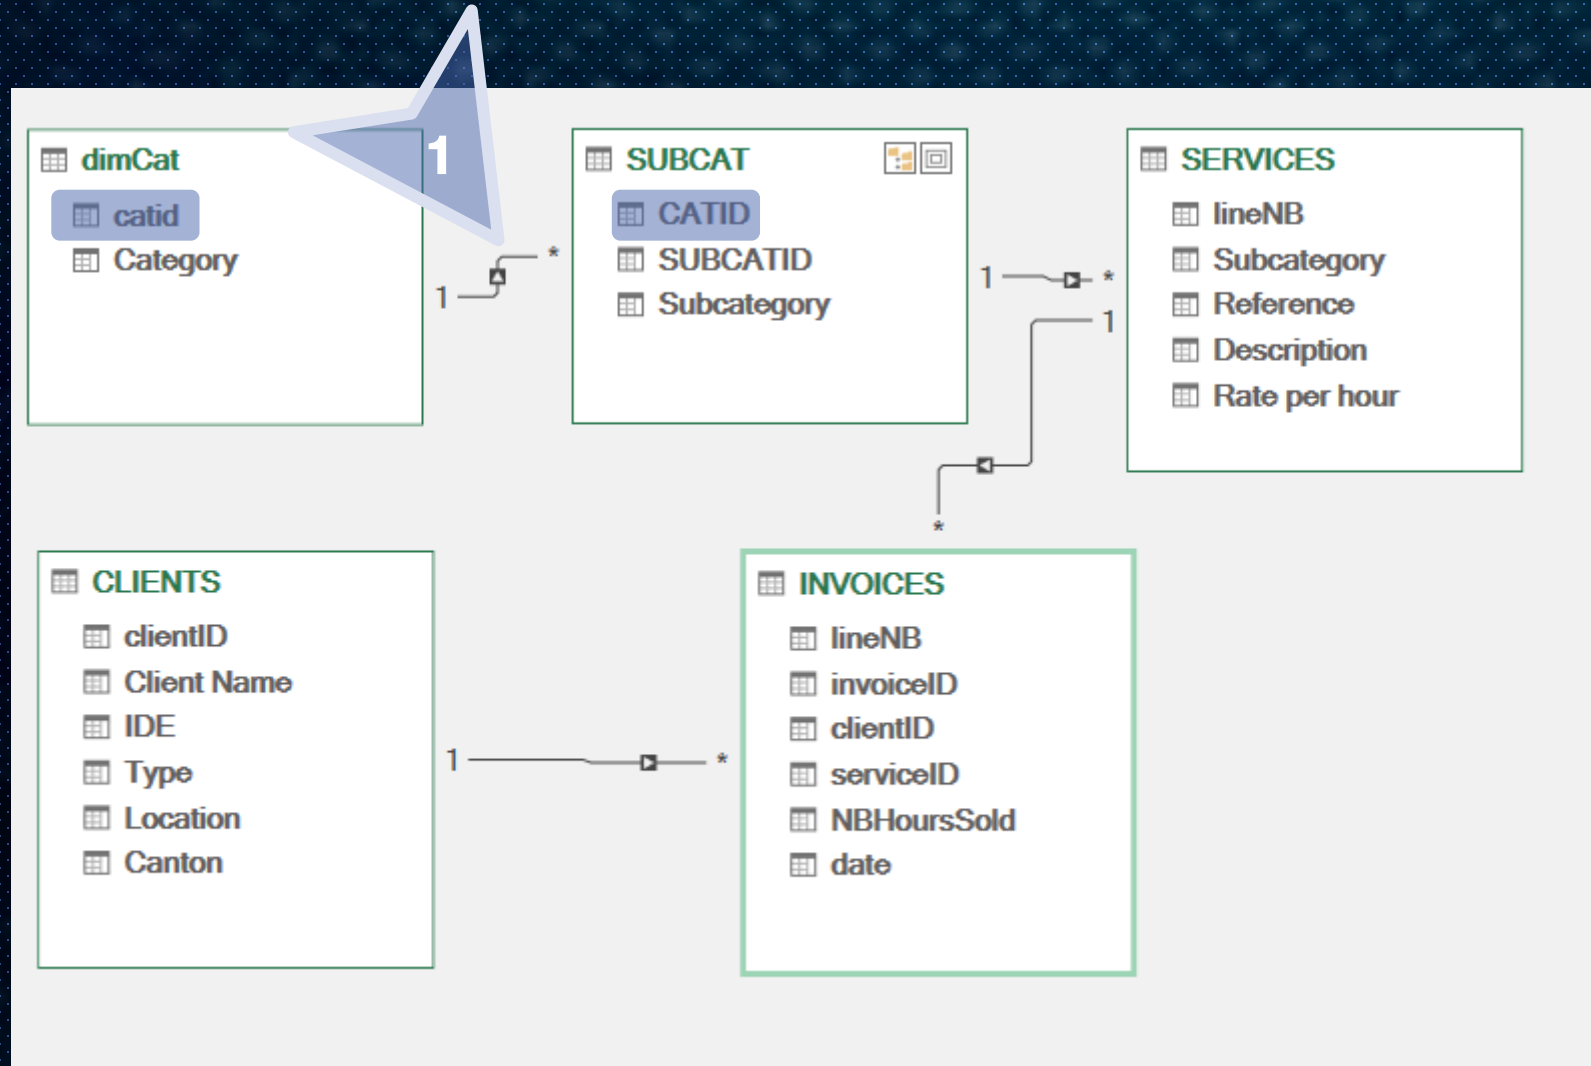

Excel Ribbon:

- Clipboard:** Paste, Paste Append, Paste Replace, Copy
- Get External Data:** From Database, From Data Service, From Other Sources, Existing Connections, Refresh, PivotTable
- Formatting:** Data Type, Format, \$, %, .00, .00
- Sort and Filter:** Sort A to Z, Sort Z to A, Clear Sort, Clear All Filters, Sort by Column
- Find:** Find, Find
- Calculations:** AutoSum, Create KPI
- View:** Data View, **Diagram View**, Show Hidden, Calculation Area

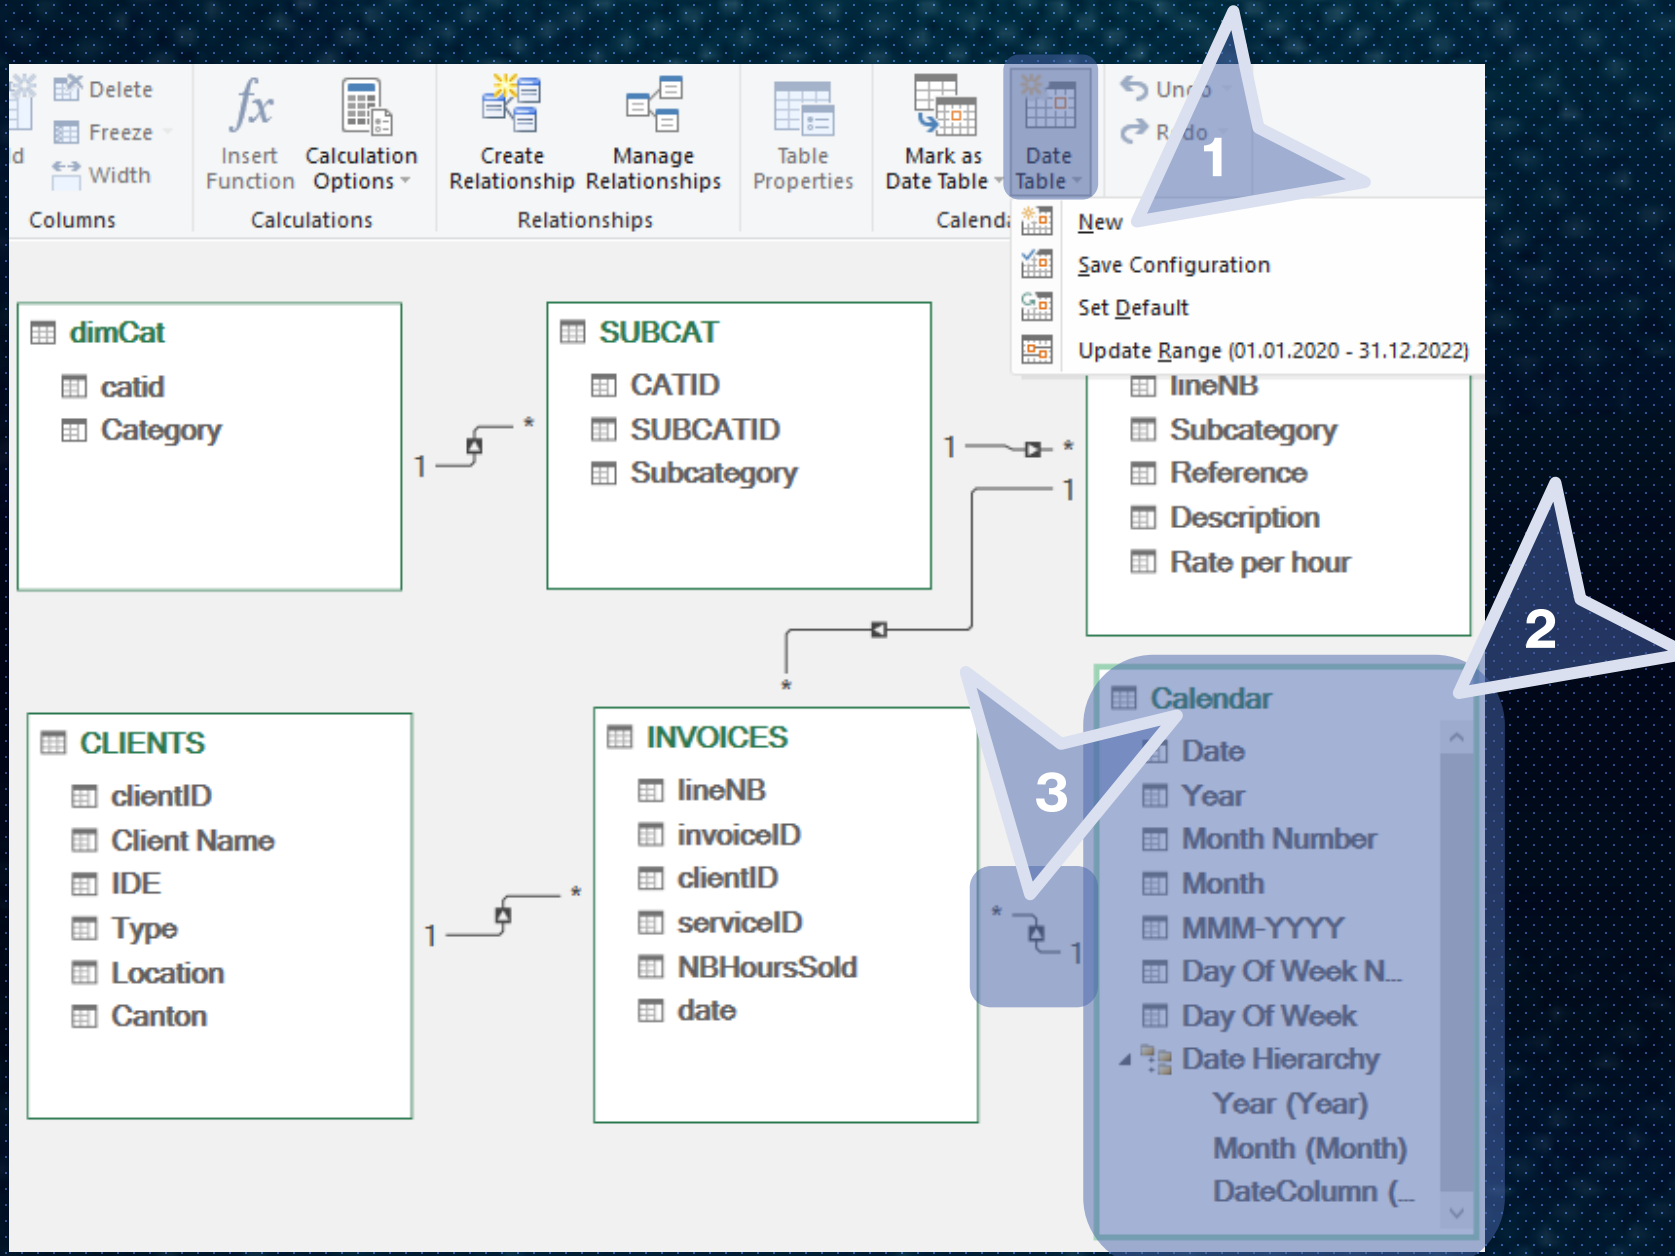

Diagram View Tables:

- CAT**
 - catid
 - Category
- CLIENTS**
 - clientID
 - Client Name
 - IDE
 - Type
 - Location
- INVOICES**
 - lineNB
 - invoiceID
 - clientID
 - serviceID
 - NBHoursSold
- SUBCAT**
 - CATID
 - SUBCATID
 - Subcategory
- SERVICES**
 - lineNB
 - Subcategory
 - Reference
 - Description
 - Rate per hour

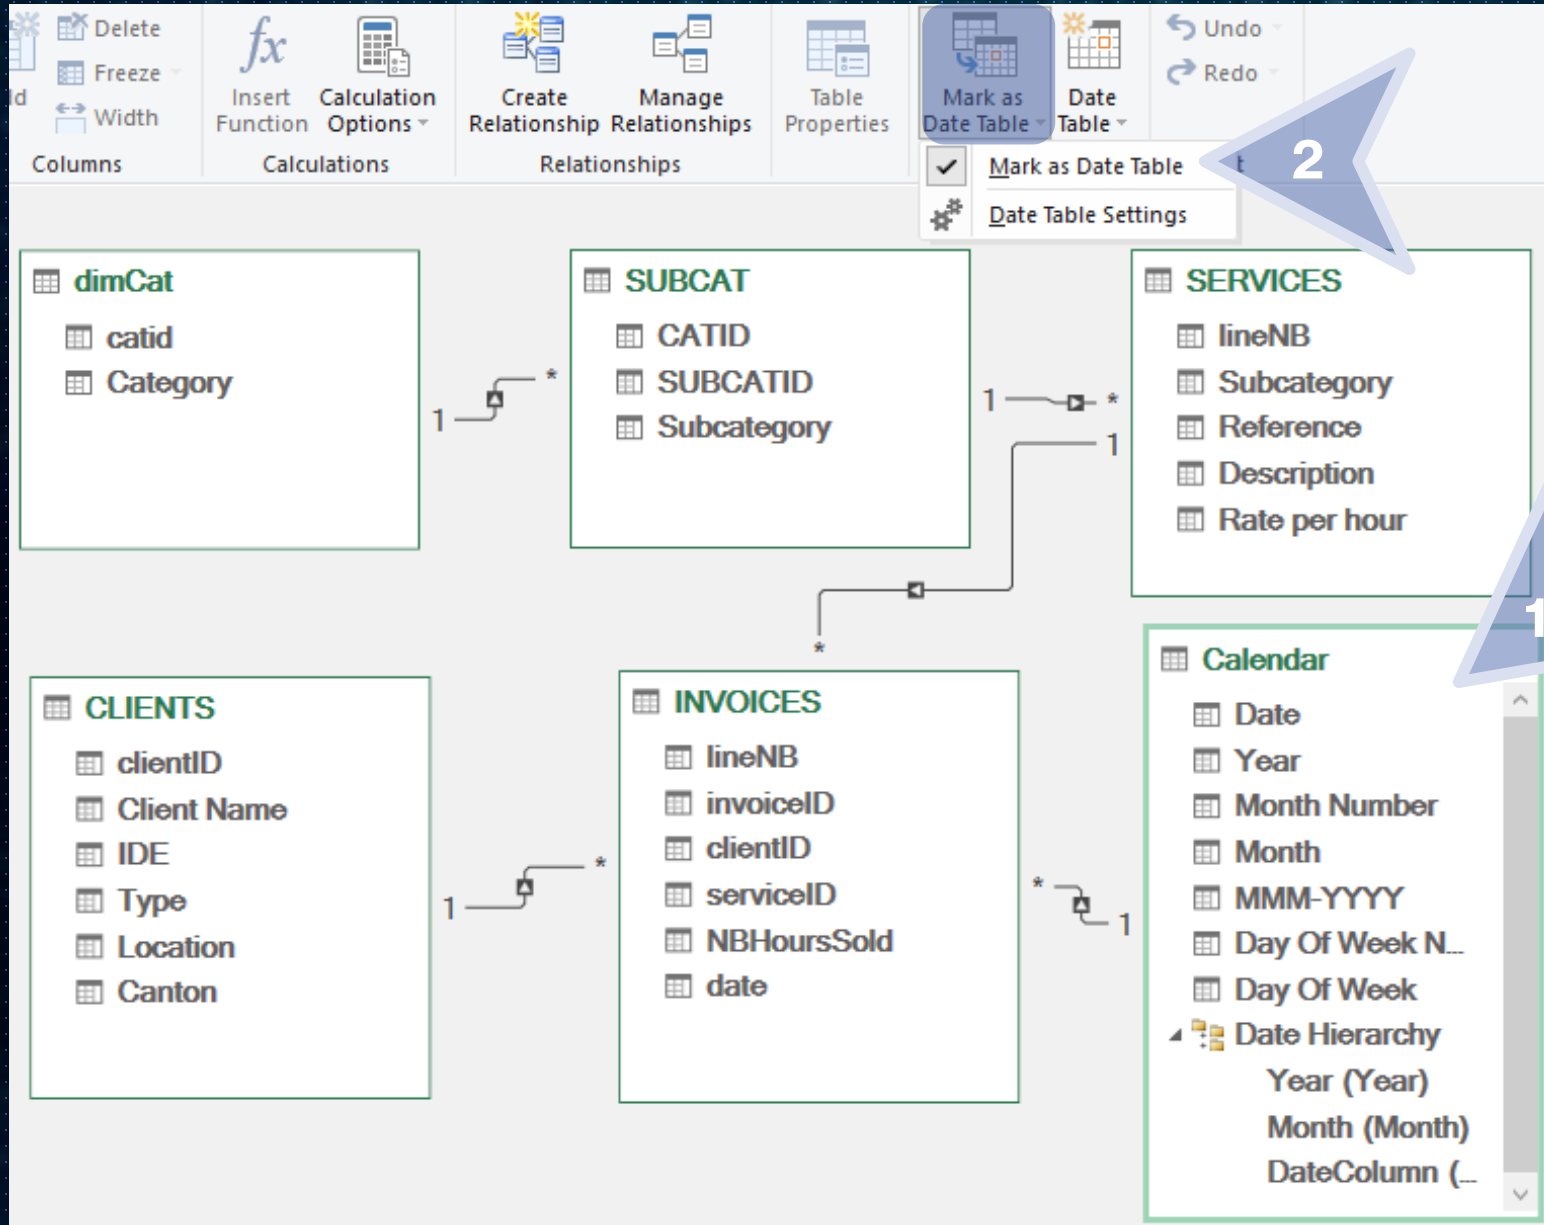

Create relationships

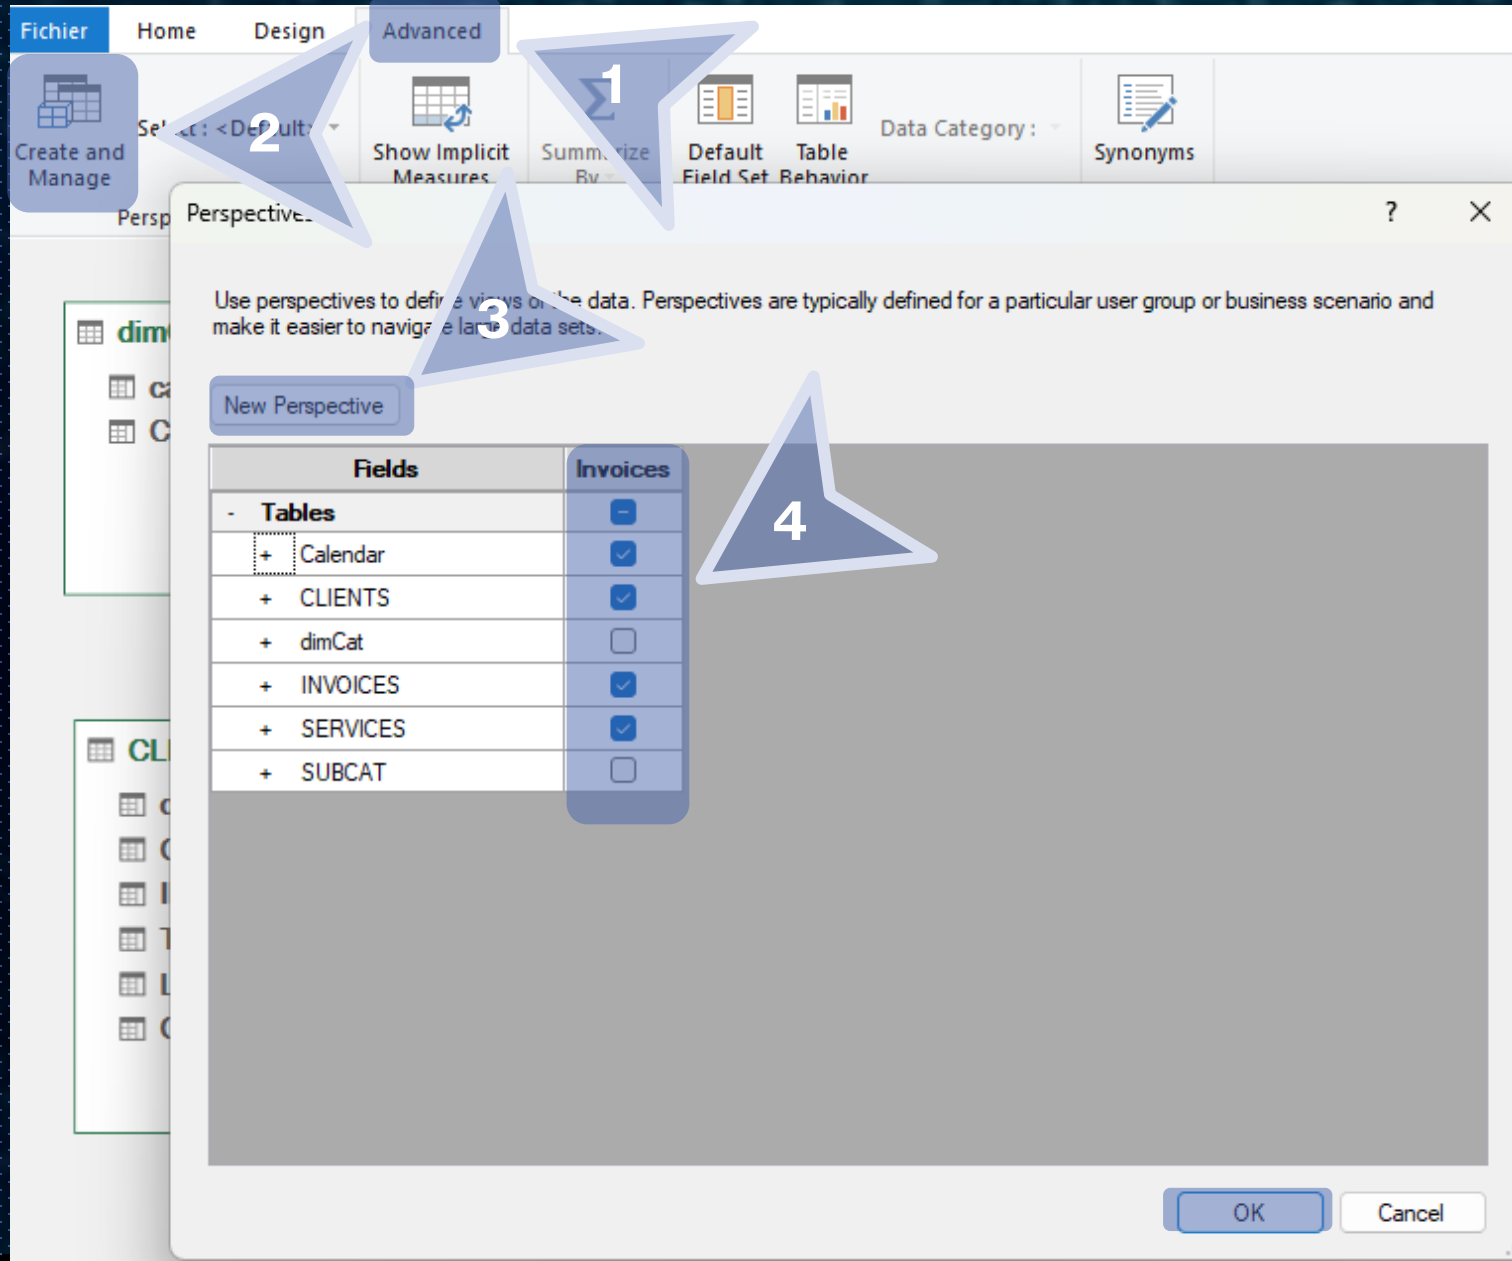

Create calendar table

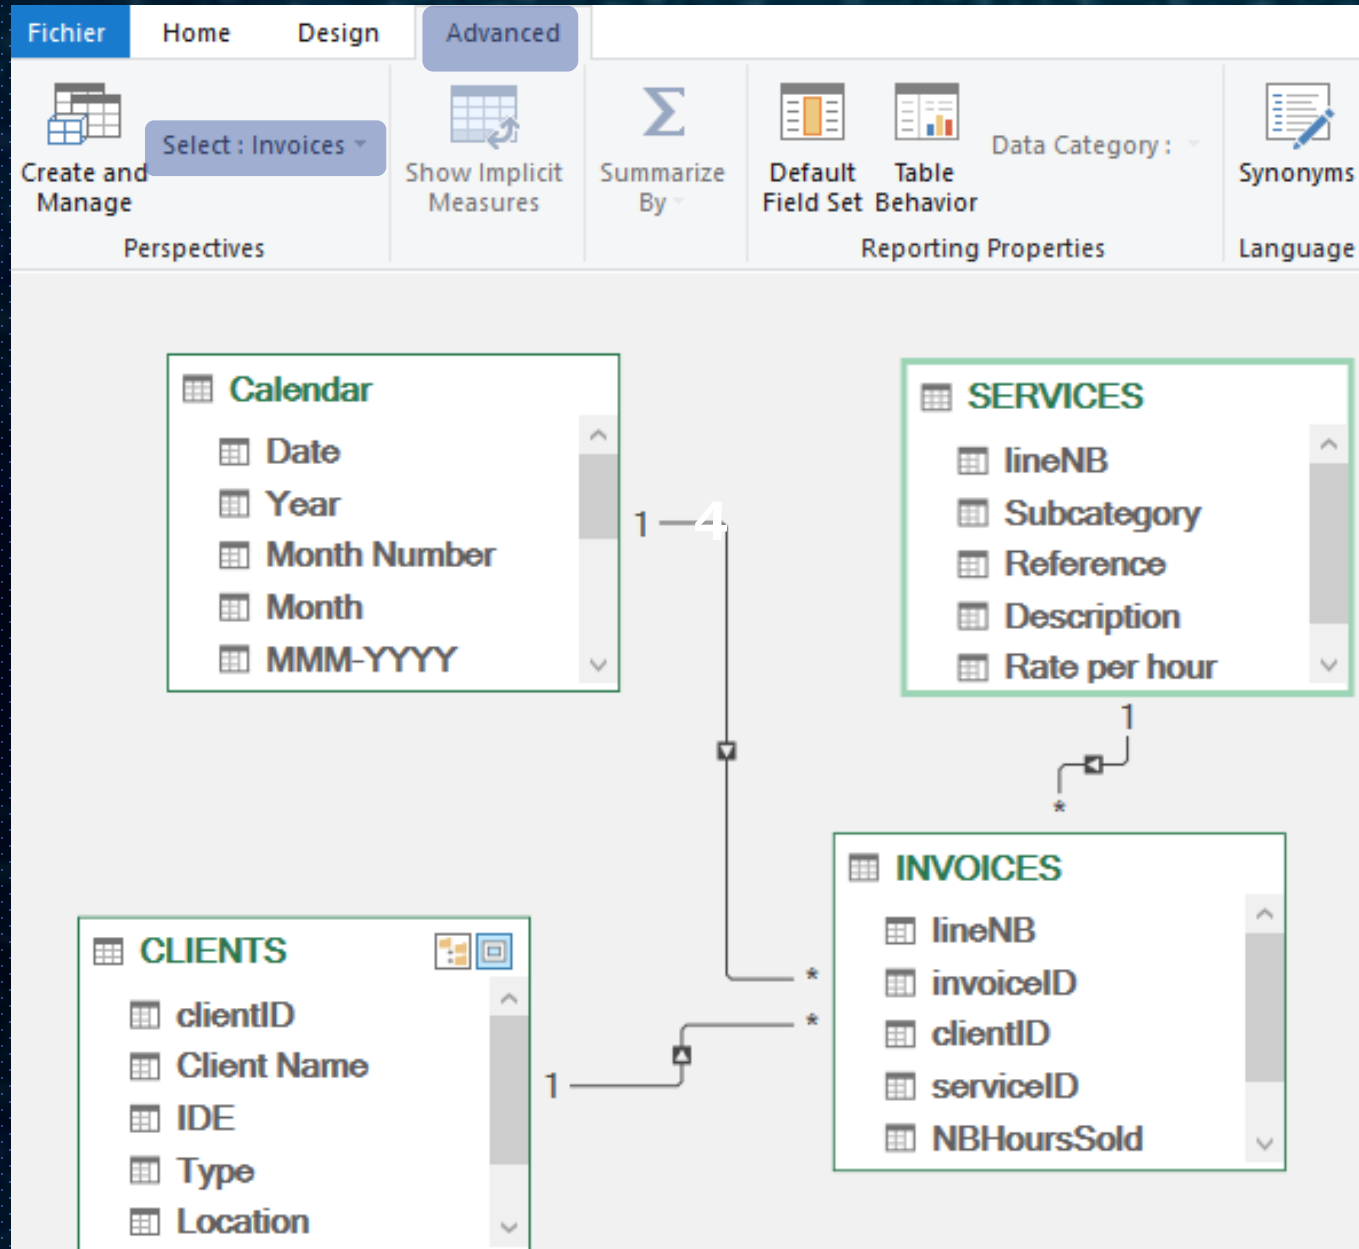

Mark as date table

Create new perspectives

Create new perspectives

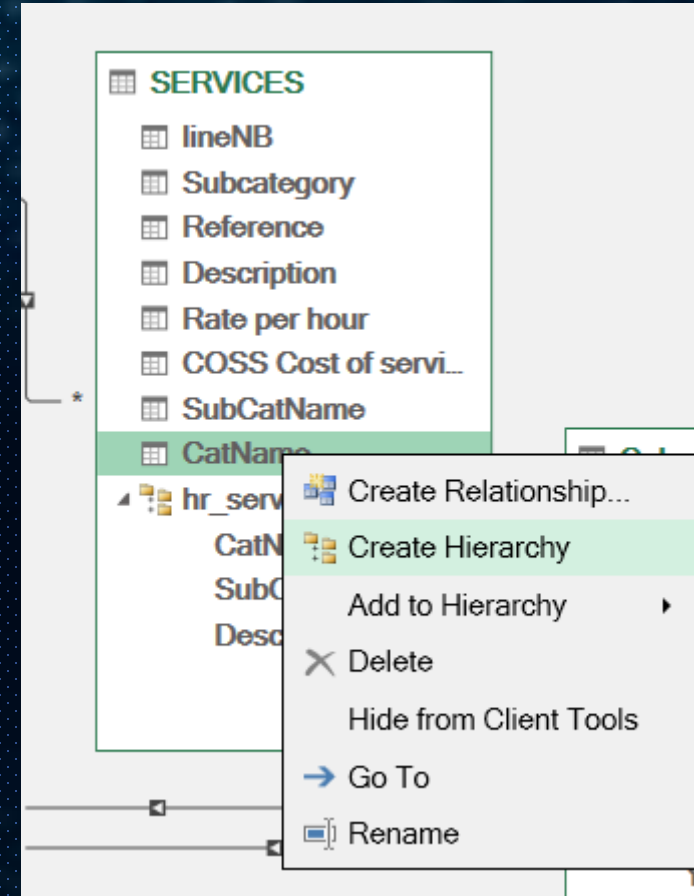

Create a hierarchy

In the Services table, create a hierarchy with CatName / SubCatName / Description and call it hr_services for example.

Start by creating a hierarchy from the CatName field then add the subCatName and Description field to the existing hierarchy.

You can also drag and drop more fields onto an existing hierarchy.

Create calculated columns

In the Services table, place the cursor inside the 'Add column' column and paste the following DAX code in the formula bar to display a foreign field in a new column:

=RELATED(SUBCAT[Subcategory])
=RELATED(dimCat[Category])

[CatName] fx =RELATED(dimCat[Category])								
	lin...	Sub...	Reference	Description	Rate ...	COSS ...	SubCatName	CatName
1	1	1	BKS-1	Savings Acc...	100	70	Personal Banking	Banking Services
2	2	1	BKS-2	Checking Ac...	100	70	Personal Banking	Banking Services
3	3	2	BKS-3	Business Lo...	120	70	Business Banking	Banking Services

16	16	8	TS-4	Tax Complia...	150	70	Business Tax	Tax Services

Create calculated columns

In the Invoices table, add the following calculated columns with their respective DAX formula:

Name of col	DAX formula
Total Sale	=INVOICES[NBHoursSold]*RELATED(SERVICES[Rate per hour])
Total Cost	=INVOICES[NBHoursSold]*70
Profit	=INVOICES[Total sale]-INVOICES[Total Cost]
Profit %	=DIVIDE(INVOICES[Profit];INVOICES[Total Cost])

[Profit %] f_x =DIVIDE(INVOICES[Profit];INVOICES[Total Cost])											
	lineNB	invoiceID	clie...	servi...	NBHoursSold	date	Total sale	Total Cost	Profit	Profit %	
1	4	20-0004	183	22	116	05.01.2020 00:00:00	17400	8700	8700	100.00%	
2	5	20-0005	246	22	129	06.01.2020 00:00:00	19350	9675	9675	100.00%	
3	30	20-0030	25	22	16	31.01.2020 00:00:00	2400	1200	1200	100.00%	
4	47	20-0047	70	22	130	17.02.2020 00:00:00	19500	9750	9750	100.00%	

Create DAX Measures 1

Go into the calculation area of table Invoices in Data View and create the following measures by using the Autosum function in the Home tab. Select the three cells under Total Sale, Total Cost and profit then click the Autosum button in the calculations group of the Home tab. Repeat for calculating the average profit % and average sale amount.

Rename the measures Turnover, Global costs, Global Profit, AVG Profit % and AVG Sale.

The screenshot shows the Microsoft Excel interface with the Home tab selected. The ribbon includes the Clipboard group (Paste, Paste Append, Paste Replace, Copy), the Get External Data group (From Database, From Data Service, From Other Sources, Existing Connections), the Refresh and PivotTable buttons, the Formatting group (Data Type, Format: Currency, \$, %, .0, .00, .000), the Sort and Filter group (Sort A to Z, Sort Z to A, Clear Sort, Clear All Filters, Sort by Column), the Find and Select group (Find, Select), and the Calculation Area group (Diagram View, Show Hidden, Calculation Area). The Autosum dropdown menu is open, showing options: Sum, Average, Count, Distinct Count, Max, and Min. A blue arrow labeled '1' points to the Autosum button. The formula bar shows the DAX measure Global Profit: =SUM([Profit]). A blue arrow labeled '2' points to the formula bar. The table below shows data for 11 rows, with columns for client, service, hours sold, date, total sale, total cost, and profit. A blue arrow labeled '3' points to the Total Profit cell in the table.

	clie...	servi...	NBHoursSold	date	Total sale	Total	Profit
1	82	21	95	15.01.2020 00:00:00	9500		125
2	226	21	30	22.01.2020 00:00:00	3000		750
3	319	21	125	07.02.2020 00:00:00	12500		3125
4	6	21	107	22.02.2020 00:00:00	10700		2675
5	194	21	9	23.02.2020 00:00:00	900		225
6	243	21	12	03.03.2020 00:00:00	1200		300
7	198	21	114	05.05.2020 00:00:00	11400		2850
8	288	21	124	14.09.2020 00:00:00	12400		3100
9	39	21	38	01.10.2020 00:00:00	3800		950
10	51	21	58	07.11.2021 00:00:00	5800		1450
11	312	21	28	17.01.2021 00:00:00	2800		700
Total NB of HoursSold: 111 521					Turnover: 13 775 360 CHF	Global Costs: 8 572 575 CHF	Global Profit: 5 202 785 CHF

Create DAX Measures 2

Select an available cell in the calculation area of table Invoices and create the following measures by typing the following DAX formulas:

TOTAL TURNOVER:=`CALCULATE([Turnover];ALL(INVOICES))`

Total NB of Hours unfiltered:=`CALCULATE(SUMX(INVOICES;INVOICES[NBHoursSold]);ALL(INVOICES))`

NB invoices:=`COUNTROWS(ALL(INVOICES))`

Format the various measures to whole number for quantities and currency for all sale related calculations.

5	21-02-2021	312	21	28	17.01.2021 00:00:00	2800
	NB invoices: 1489			Total NB of Hours unfiltered: 111 521		Turnover: 13 775 360 CHF
				TOTAL NBHours: 111 521		AVG sale: 9 251 CHF
						TURNOVER unfiltered: 13 775 360 C...

Create Pivot Table

Insert a Pivot table from Power Pivot and display the date hierarchy in the rows and the turnover, the global profit and the NB Invoices in the values.

Insert the turnover a second time in the values and display as % of column total. Rename that column «% total».

	A	B	C	D	E

Create a New Measure from Data View

Create a % CY measure to display the % of each monthly sale compared to the Current Year total.

Use Power Pivot > Measures > New Measure

The 'Measure' dialog box is shown with the following fields:

- Table name: **INVOICES** (indicated by arrow 2)
- Measure name: **% CY**
- Description: (empty)
- Formula: **f_x** (indicated by arrow 3)
- Check formula button
- Formula text area:

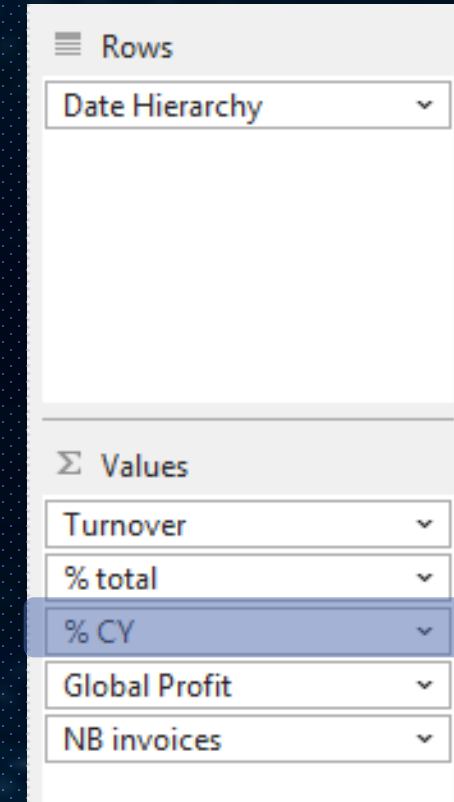

```
=DIVIDE(  
    [Turnover];  
    CALCULATE(  
        [Turnover];  
        ALL('Calendar'[Month])  
    )  
)
```
- Formatting Options section:
 - Category: **Number** (selected from a list including General, Number, Currency, Date, TRUE/FALSE)
 - Format: **Percentage**
 - Decimal places: **2**
 - ☐ Use 1000 separator (,)
- OK button

Insert new measure in Pivot Table

Insert the [% CY] measure in the values of the pivot table next to [% total].

Insert the turnover a second time in the values and display as % of column total.

	A	B	C	D	E	F
1	Row Labels	Turnover	% total	% CY	Global Profit	NB invoices
2	2020					
3	janvier	496 140 CHF	3.60%	10.50%	177 075 CHF	59
4	février	509 980 CHF	3.70%	10.79%	186 330 CHF	58
5	mars	729 280 CHF	5.29%	15.43%	317 680 CHF	62
6	avril	543 500 CHF	3.95%	11.50%	215 650 CHF	60
7	mai	634 600 CHF	4.61%	13.43%	252 430 CHF	62
8	juin	542 880 CHF	3.94%	11.49%	185 420 CHF	60
9	juillet	28 300 CHF	0.21%	0.60%	13 760 CHF	4
10	août	40 380 CHF	0.29%	0.85%	17 310 CHF	4
11	septembre	500 660 CHF	3.63%	10.59%	187 050 CHF	52
12	octobre	542 660 CHF	3.94%	11.48%	232 020 CHF	62
13	novembre	157 920 CHF	1.15%	3.34%	52 800 CHF	14
14	2020 Total	4 726 300 CHF	34.31%	100.00%	1 837 525 CHF	497

Editing existing measures

Click on Power Pivot > Measures > Manage Measures

The screenshot shows the Excel interface with the Power Pivot ribbon selected. The Measures group is expanded, and the 'Manage Measures...' button is highlighted. A blue arrow labeled '1' points to this button. To the right, the 'Manage Measures' task pane is open, displaying a list of measures and their formulas. A blue arrow labeled '2' points to this task pane.

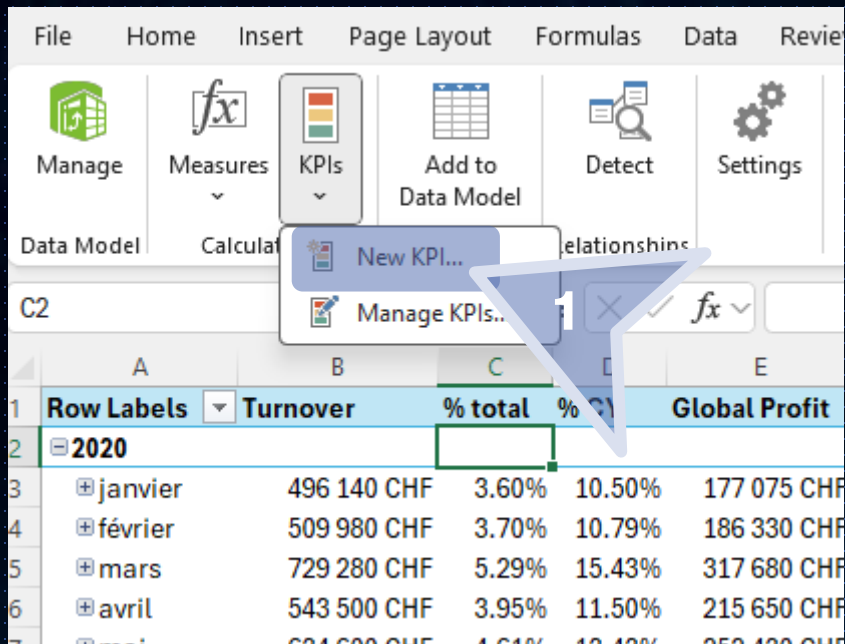

Measure	Formula
% CY	<code>DIVIDE([Turnover],CALCULATE([Turnover],ALL('Calendar'[Month])))</code>
AVG Profit %	<code>AVERAGE([Profit %])</code>
AVG sale	<code>AVERAGE([Total sale])</code>
Global Costs	<code>SUM([Total Cost])</code>
Global Profit	<code>SUM([Profit])</code>
NB invoices	<code>COUNTROWS(INVOICES)</code>
NB invoices unfiltered	<code>COUNTROWS(ALL(INVOICES))</code>
Total NB of Hours unfiltered	<code>CALCULATE(SUMX(INVOICES,INVOICES[NBHoursSold]),ALL(INVOICES))</code>
TOTAL NBHours	<code>SUM([NBHoursSold])</code>
Turnover	<code>SUM([Total sale])</code>
TURNOVER unfiltered	<code>CALCULATE([Turnover],ALL(INVOICES))</code>

Insert KPI

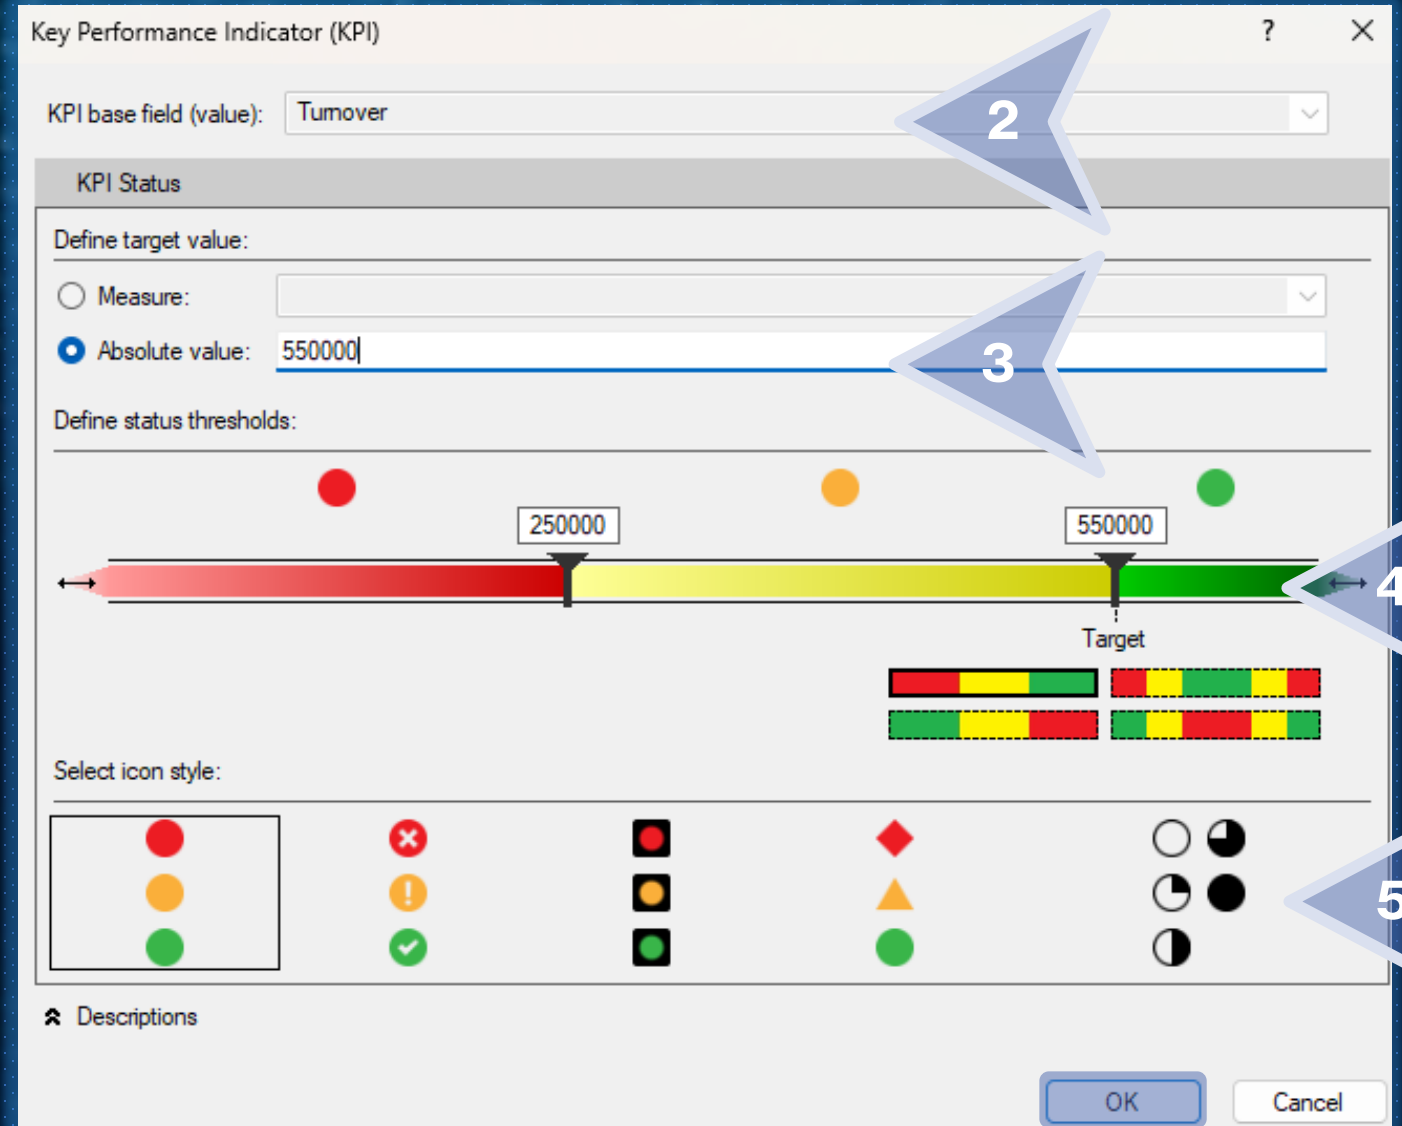

Click on Power Pivot > KPIs > New KPI

Choose the base field (to be compared with the KPI value).

Choose an absolute value of 550K
Set the Thresholds and the type of icons to display.

	A	B	C	D	E
1	Row Labels	Turnover	% total	% of total	Global Profit
2	2020				
3	janvier	496 140 CHF	3.60%	10.50%	177 075 CHF

Insert a new pivot table & chart

On a new sheet , duplicate the existing pivot table and keep only the global profit column in the values. Place the Calendar[Year] in the columns and the hr_services hierarchy in the rows.

Insert a slicer with the cantons.

Insert a pivot chart (clustered columns).

Global Profit

Insert a new pivot table & chart

On a new sheet , duplicate the existing pivot table and keep only the turnover and the NB invoices column in the values. Place the Client Name column in the rows.

Insert a slicer with the Type.

Filter the rows by the value of turnover in descending order and keep the top 15 values.

Convert the pivot table into cube functions.

Insert a funnel chart based on the cube functions even though that type of chart is not allowed on pivot tables.

Insert a pivot chart based on cube functions
